Aged care

Welcome

At Cubro®, we believe in quality of life for all, regardless of age or ability. We're a trailblazing company that has been innovating and shaping the future of healthcare since 1983.

We provide a range of specialist equipment solutions that are designed to make it easier for healthcare professionals to deliver the best care possible. Our goal is to revolutionise healthcare through innovation, and we're dedicated to caring for people and finding life-changing solutions that help achieve the best health outcomes in our clients' unique environments.

We are privileged to have helped so many New Zealanders to live better lives, and we look forward to partnering with you to help many more.

Underbed clearance	150mm	150mm	150mm

- Patented SafeFree mobilisation aids with 4 different heights eliminate the dangerous middle gap and helps care teams to meet new restraint guidelines
- Enables care teams to use 4-stop-strategy to prevent falls and provide optimal working heights for care teams
- Ultra low height of 230mm
- Full 4-section electric functions with double sleeping surface retraction (mattress compensation). This reduces friction and shear forces for effective pressure injury prevention
- Smart handset featuring 3 safety levels, 2 automatic positions and night light
- Sideguards with 4 different heights
- Integrated bed extension by 100 or 200mm - adjusted without tools in seconds
- Central braking system with one pedal brake for each axle
- Two automatic comfort/positioning settings
- Compliance with new standard IEC 60601-2-52
- Made in Germany

The fear of falls is one of the most common psychological burdens for a resident, leading to limited physical activity, a loss of self-confidence and social isolation. The Sentida SC range, in ultra-low height, has achieved an uncompromising implementation of the requirements of modern nursing care - maximum safety, together with a cosy design.

The innovative 4-stop strategy and the patented SafeFree mobilisation aids helps to reduce falls, as well as the consequences associated with them and set new standards in terms of safety, mobility, height adjustability and cosiness.

The desire to be in an environment that promotes homeliness, individuality, safety, comfort, and flexibility is stronger than ever, and the furniture details are a big part of making the facility rooms feel just like home.

The homelike model variant is available with either central brakes or axle-braked castors and offers a particularly homelike appearance, thanks to its designer castor cover. Plus you can talk to our team about matching your nursing bed to the rest of your room's décor.

An additional SafeSense bed sensor system option is also available, for those who desire a sustainable fall prevention system. SafeSense is intelligent monitoring technology that provides greater safety without the need for restraints. It is equipped with an individual alarm system, as well as an automatic night light, for when the resident leaves the bed, which is then deactivated when the resident is back in the bed. The individual alarm system is adjustable from 0 to 30 minutes. It is easily adaptable to resident's mobility, including an early warning mode that means nursing staff can be called as soon as the resident falls out of bed.

Designed to address the rigorous demands of nursing care, the Sentida SC XXL offers an impressive workload capacity of 300kg, ensuring it can handle the most demanding care scenarios.

With a generous 1200mm-wide lying surface, this bed offers ample space and ensures exceptional comfort for residents of all ages and sizes, fully optimising their well-being. Designed to streamline care processes and align with various care concepts, offering enhanced comfort and support for residents whilst making lighter work of caregiver duties.

Where timeless design meets smart functionality

Cubro's intelligent bed solutions are thoughtfully designed and known for their ambient non-institutional appearance. Made in Germany, the beds can be fully digitalised to provide real-time alerts to support safe and efficient care strategies.

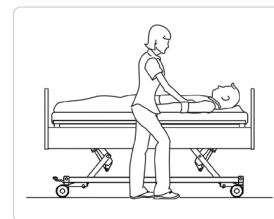

- Full four-section electric functions with profiling lying surface
- Ultra-low height adjustment with a three-stop height strategy to allow for safe nursing care, mobilisation and sleep
- Unique comfort seating position to make breathing easier for the user, as well as aid digestion
- Smart handset with three safety levels: standard, resident (limited functions) and locked mode
- Vertical raise, to reduce risk of holes in walls behind the bed
- Underbed clearance for patient lifters at any position
- Integrated bed extension: 200mm
- Compliance with new standard IEC 60601-2-52

The comfortable adjustment range from 230 to 800mm enables:

- An ergonomic and back-friendly working/care position at 800mm
- In combination with the separately adjustable thigh rests and calf rests, additional freedom of movement, e.g., for basic care or wound care
- An effort-saving "bed/chair" transfer and vice versa with the mobilisation height at chair height of 410mm
- A safety stop at a height of 310mm, which provides protection against foot entrapment and at the same time provides a good mobilisation height for smaller residents
- With a safe sleeping position of 230mm

4-stop height adjustment strategy

The Sentida SC beds are height adjustable and automatically pause at four different height levels:

800mm

Optimum nursing position

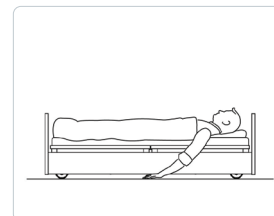

The highest setting is 800mm, the optimal nursing height, meaning carers don't have to bend over

410mm

Safe mobilisation at chair height

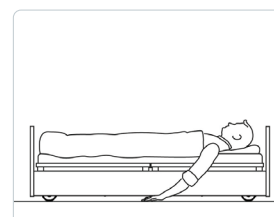

At chair height, 410mm provides the optimal height to get out of the bed safely

310mm

Safety stop / safe mobilisation for smaller residents

Provides a safer height for smaller residents to get out of bed safely

230mm

Falls prevention during sleeping phases

The lowest setting offers a low height to reduce the risk of injury of falls while sleeping

Bed extension

Flexible and time-saving: two bed lengths that can be adjusted without tools.

The Sentida SC bed range fits to you and your residents' needs, so even your tallest user can get the good night's sleep they need.

- Alternative bed length of 2100mm: Protection with longer side rails at the foot end without accessories and without a gap > 318 mm
- Bed extension to 2200mm: also temporarily adjustable with divided side rails for Sentida – complete protection through foot-end protector (accessory) is guaranteed

Sentida SC has an integrated bed extension as standard, which complies with the normative requirements IEC 60601-2-52 in any configuration.

Safe mobilisation

Divided mobilisation aids are very useful for effective mobilisation, as they are easy to grab and clasp. They can be used as a safe standing-up aid and to support the resident's mobility.

Each mobilisation aid can be individually set at four heights to enable the correct amount of support for the user, and drop down completely below the mattress level when not in use.

- ⤴ Mobilisation aids can be set to four different heights to assist the resident with getting in and out of the bed and for rolling/turning within the bed

SafeControl® handset - clear, ergonomic and intuitive

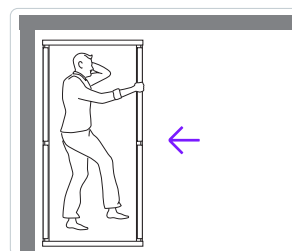

SafeControl® is:

- Clear and ergonomic in its design
- Intuitive in operation and first-time error-proof due to preselection
- Easy to read even in the dark thanks to the motion sensor system with backlighting
- Can be placed flexibly and safely on the SafeFree® siderail element
- Equipped with special care functions
- Secured against incorrect handling by an integrated locking function

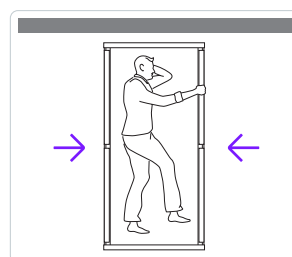

All-round access for nursing tasks with divided mobilisation aids

- Flexible use of the bed for standard care, even in limited spaces
- Flexible access from both sides of the bed in case of increased need for care
- Flexible use of the bed for bed exit on the left or right side to mobilise the resident
- Avoiding follow-up costs for upgrading divided mobilisation aids

- ⤴ Standard nursing – Access from one side is sufficient

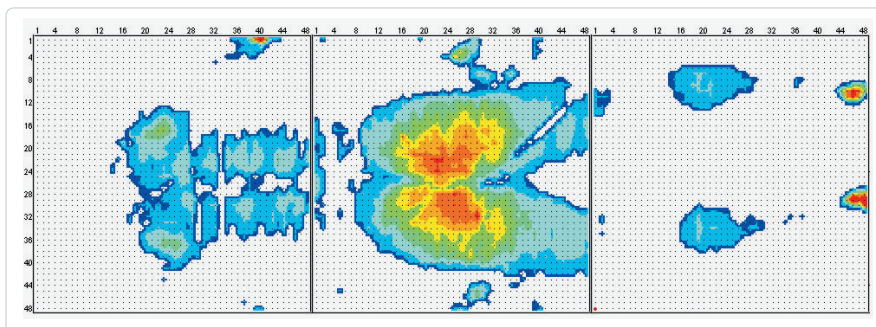

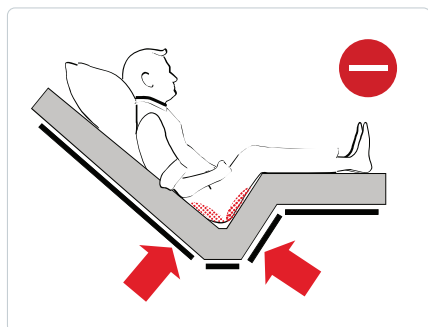

- ⤴ Increased need for care – Access from both sides needed

Mattress compensation

The Sentida SC beds feature a retracting sleeping surface (mattress compensation) which reduces friction and shearing forces for effective pressure injury prevention

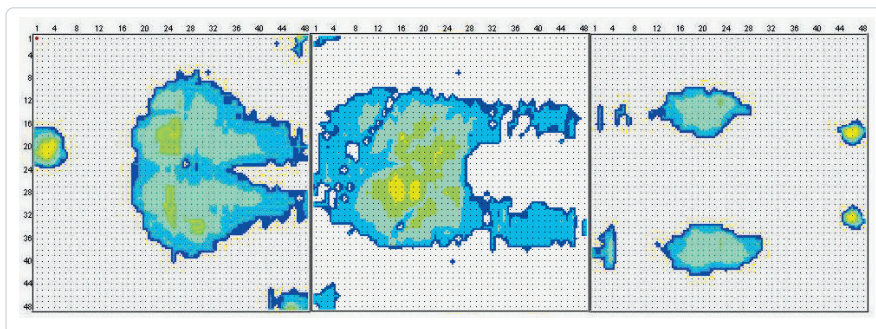

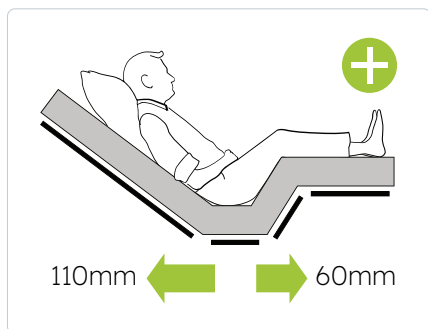

Single retraction = risk of pressure ulcer

Standard patient surface without relief

Pressure mapping image of a standard patient surface shows areas at increased risk of pressure injury

Double retraction = pressure ulcer prevention

Patient surface with notable relief

Pressure mapping image of a Wi-bo® BiNetic patient surface showing notable relief

The double retraction

- Optimises the support surface in the seat area by increasing the surface area of the backrest and thigh rest
- Reduces pressure on sensitive areas of the body such as the buttocks and coccyx
- Facilitates breathing by creating more space through a relaxed sitting position in the chest and abdominal area
- In combination with the long backrest of almost 900mm offers preventive and comfortable positioning for immobile residents

Movita SC bed

The low nursing bed Movita SC is not only the basis for all requirements in nursing care, but also presents an alternative economically efficient solution within the wissner-bosserhoff range. This versatile nursing bed offers a comprehensive range of features and equipment options that will delight both caregivers and residents alike.

With the new handset and other innovative functions, the Movita SC provides comfortable care while ensuring the highest level of product safety. With a homelike design, you create a dignified care environment for your residents.

Learn how this care bed helps you achieve the optimal price/performance ratio without compromising on comfort and safety. Discover the versatility of Movita SC and why it's the optimal choice for nursing homes and homes for the elderly looking for a reliable solution.

Code: 20042

Size	Single
Safe working load Incl. mattress, occupant(s) and accessories	205kg

- Helps users to reposition themselves in bed
- Can be mounted on either side of the bed
- Suits all Wi-bo® beds

Code: 20021

Sentida SC wall protector

Telescopic head end wall spacer. Wall protectors are a great investment to help ensure your walls and the bed is not damaged when it's repositioned or moved. This version is designed for Sentida SC beds.

Code: 20009

Sentida MobiStick 2

The MobiStick 2 enables clever bed operation for residents. Its ergonomic shape makes it easy and intuitive to use anywhere. Residents can effectively support and move themselves.

Features:

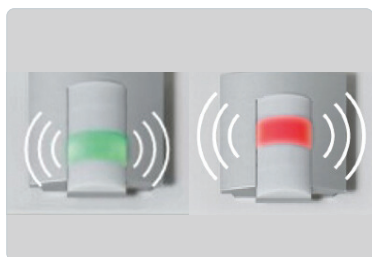

- Due to its ergonomic shape MobiStick2 is easy and intuitive to use and universally applicable. The hand knob is rotatable and has a simple locking mechanism
- The resident can support themselves well and mobilise themselves
- MobiStick 2 can be attached without tools on both sides of the bed, is suitable for every resident size and can be retrofitted for wissner-bosserhoff beds from 2004 onwards

SafeLift

- Offers the simplest functions so that residents can adjust their bed independently and set it to the best mobilisation position for them
- Can also be used to support themselves when standing up
- Adjustment buttons for bed height and backrest
- Large buttons
- Go button
- 360° rotation
- Ergonomic design
- Strong stability

SafeSense

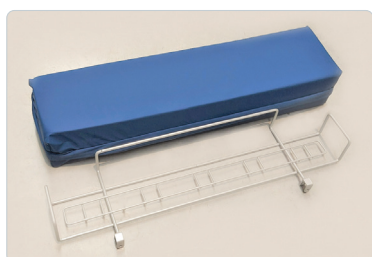

Code: 20038

SafeSense to suit Sentida SC

SafeSense is an intelligent bed sensor system that provides greater safety without the need for restraints. It is equipped with an individual alarm system, as well as an automatic night light that activates when the resident leaves the bed, and is then deactivated when the resident is back in bed.

- Faster response time in the event of falls
- Reduction of restraints
- Automatic night light
- Alarm is adjustable from 0 to 30 minutes
- Adaptable to residents mobility
- Early warning mode

Sensor mats	36
Landing mats	39
Perimeter surrounds	39

Fall prevention and alarms

Falling is one of the greatest risks for the physical health and psychological wellbeing of elderly people. The fear of further falls is one of the most common psychological consequences, leading to limited physical activity, a loss of self-confidence and social isolation.

Innovations for independence

At Cubro, we believe that the use of systems and measures that deprive residents of their freedom are no longer necessary. Instead innovations such as lower beds, mobilisation aids or smart detection devices, can be used as enablers to support a resident's independence and mobility.

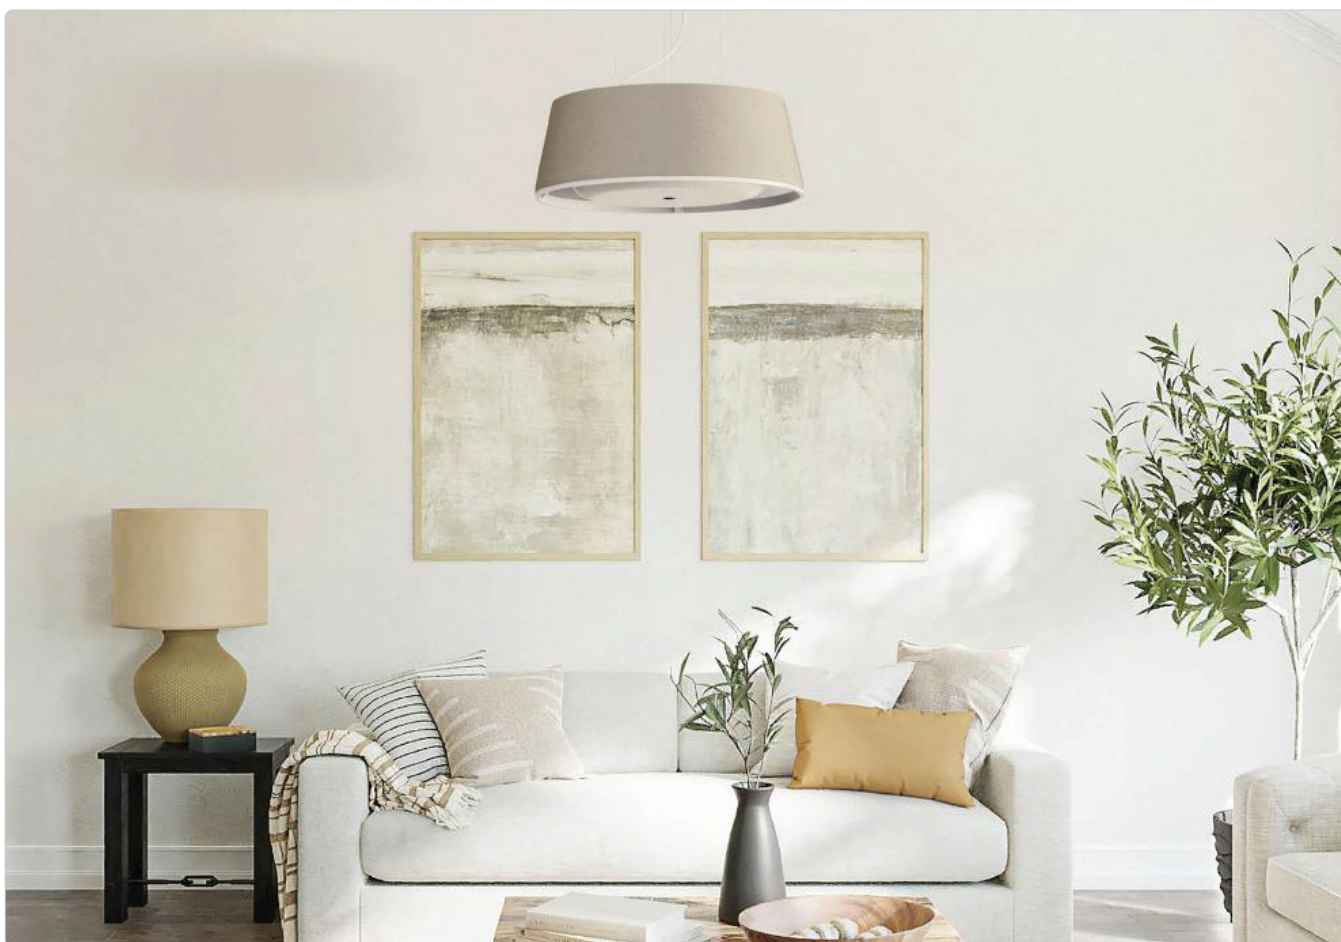

While falls can never be truly eliminated, there are a number of product innovations to consider when preventing a fall or reducing its impact.

These include the use of:

- Wider beds
- Mobilisation aids
- Ultra-low beds
- Smarter digital detection tools
- Landing mats

Check out our range of smart detection devices and fall prevention equipment today.

Nobi

Nobi combines optical care sensors and artificial intelligence in a stylish, life-saving lamp that fits seamlessly into any interior.

The smartest lamp in the world, developed for fall detection, fall prevention, fall prediction and safer living. This smart ceiling lamp is packed with cutting-edge technology, using an AI-system to accurately monitor every room.

Thanks to notifications when getting in and out of bed, caregivers can proactively help to avoid falls. Built with a user-friendly dashboard, this system gives a 24/7 overview of all activity in all Nobi-equipped rooms, including a link to medical records.

Nobi Pendant

Nobi's attractive and timeless design for living rooms and bedrooms.

Available in desert and slate

Nobi Ceiling

This Nobi lamp is mounted on the ceiling in living rooms and bedrooms.

Available in desert and slate

Nobita

Nobi's little sister is sleekly designed and hangs in smaller rooms such as the kitchen or bathroom.

Available in white

Smart digital care in real time

Care monitor

A smart, fully digitalised, platform that allows you to monitor your residents' health and risks in real time. Easily connects to a smartphone tablet, PCs and nurse call systems.

Intelligent bed exit monitoring

Helps reduce the consequence of falls. Indicates when the resident is exiting the bed through the nurse call system, allowing for a quick response.

Moisture assistant

Detects moisture in the bed at an early stage, all done through a silent alarm that is transferred to the in-house call system.

Movement monitoring

Collects vital data such as respiratory and heart rates in real time, without disturbing the resident. Acts as a guard against pressure injury prevention by tracking the lack of movement in the resident's bed. All information is sent straight to the care monitor.

Talk to us about how we can utilise smart digital care in real time, in your facility.

SafeSense

Code: 20038

Safety + freedom by day and by night.

Sustainable fall prevention for utmost safety. This bed exit assistance system can considerably increase the level of safety, especially during night and weekend shifts with fewer staff. The bed exit assistant system can minimise the need for side guards. The freedom of the patient is maintained.

- Faster response time in the event of falls
- Reduction of restraints
- Automatic night light
- Alarm is adjustable from 0 to 30 minutes
- Adaptable to residents mobility
- Early warning mode

The SafeSense intelligent bed exit sensor works like a traffic light, making it very easy to understand:

Timer not activated

Timer activated

e.g: 15 minutes to go to the bathroom or the alarm can also be set to instantly activate the nurse call system when the resident goes to get out of bed, giving very early alerts to care staff

Timer elapsed

This signals to the nurse call system

SafeSense Retro intelligent bed exit sensor

Code: 20032

Equipped with the same features and benefits as the SafeSense intelligent bed exit sensor, this stand-alone system can be retrofitted to the Practico bed model.

SafeSense with constant signal

Code: 20031

Designed to suit specific nurse call systems.

Shape	Rectangle	Curved	Curved
Colour	Care grey	Care grey	Care grey
Warranty	4 years	4 years	4 years

- Pressure-sensitive mat designed to assist care staff in preventing potential falls, without restricting a resident's independence or movement
- Early intervention, triggered by the CareMat, can reduce the risk of falls. Falls which can arise from residents who have dementia, are disorientated, or wander
- Reliable alarm sensor and robust, durable construction
- Wired or wireless connection to your in-house nurse call system
- Material: Polyurethane
- Active grip structure surface creates a secure, non-slip surface
- Hygienic and easy-to-clean material, with no crevices for grime to gather
- Handles for easy carrying
- Cable-on wired-version can be replaced if damaged
- Available in curved or rectangle shape (wireless only comes in curved)
- Four year warranty, seven year life span

Certification and conformity:

- ISO 9001:2015 Quality Management System
- ISO 14001:2015 Environmental Management System
- Products approved by TÜV and SUVA
- Products fulfill EU-directives
- Declarations of conformity for each product
- Compliance with the REACH-regulation 1907/2006

Oakwood® landing mat

Code: 1140

Overall dimensions	W 610mm L 1780mm H 25mm
<ul style="list-style-type: none"> • Non-slip vinyl base prevents mat from slipping away from the bedside • Low profile to prevent trips - only 25mm thick with tapered-to-the-floor edging • Easy-to-roll carts, chairs, beds and tables over surface • Easy-to-clean surface • Heavy duty vinyl cover, bonded to provide greater impact distribution 	

Softech® perimeter surround

Code: 1570-1

Overall dimensions	W 900mm L 2000mm H 150mm
<ul style="list-style-type: none"> • Wedge-shaped foam sections act as a gentle reminder to those lying in bed of the location of the mattress edges • Quick-release buckles easily secure the surround to the bed • The bi-elastic waterproof cover is breathable, stain-resistant, fire-resistant, antiallergenic and has antimicrobial properties • Zippered-foam compartments to facilitate washing of cover • 380mm openings in the min-section for easy entry and exit • Meets CA #117, Section 3 Flame Retardant Standards 	

Seating

Bea mobile recliner

Overall dimensions	W 760mm
	D 880mm
	H 1120mm
Seat dimensions	W 520mm
	D 540mm
Seat height	470mm
Castors	100mm

- Wide, curved arms provide an easy grip surface and assist your resident to get in and out of the chair
- Curved wings promote lateral support and correct posture, so your resident feels both comfortable and supported
- The leg rest folds securely away, allowing your resident's feet to plant firmly on the ground, forming a 90° angle, before safely exiting
- The recline system can be easily controlled by your resident or care staff, depending on the individual needs of the resident
- A zero-gravity position can be achieved when reclined, creating a comfortable place to rest and assisting with pressure care
- Equipped with easy-to-wheel, smooth twin-track castors and timber push handle, it allows your resident to be moved around your facility with ease
- Designed with a steel base plate, creating a solid, durable foundation for the chair, and helping to eliminate general wear and tear seen with usual timber framing
- Showcases a modern, sleek look and feel, with durable, easy-to-clean fabric options available

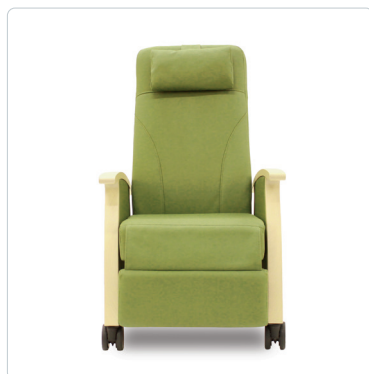

Milan mobile recliner

Overall dimensions	W 740mm
	D 800mm
	H 1030mm
Seat dimensions	W 460mm
	D 500mm
Seat height	460mm
Castors	100mm

- A traditional comfy aesthetic, creating a homely feeling for your resident
- Designed to feature a slim, sleek frame compared to the standard, wider, bulkier recliner chairs
- Featuring a buttery soft layer of padded fabric, creating the ultimate comfort spot to melt into the chair for rest and relaxation
- All fabric options are durable and easy-to-clean
- Stability is built into this chair with a solid steel base plate, allowing your resident to go from reclining to sitting without tipping the chair forward and risking a fall
- The recline system can be easily controlled by your resident or care staff, depending on the individual needs of the resident
- The seat depth is supportive and has spring-loaded padding, great for lumbar support

Lloyd mobile recliner

Overall dimensions	W 660mm D 880mm H 1200mm
Seat dimensions	W 530mm D 502mm
Seat height	460mm
Castors	100mm

- Developed with a modern, sleek European aesthetic adding a contemporary element to your facility's décor
- Showcases slimline features, making this chair the perfect addition to a bedroom setting or living room space
- Smooth, contoured padding allows for postural support, whilst also being comfortable for those extended periods of sitting
- The castor size creates fantastic manoeuvrability, paired with the push handle on the back of the chair, helping care staff move residents around the facility with ease
- A resident can easily transition from seated, lying or standing in this recliner, however, should they require higher levels of care, the push handle also allows the care staff to control the chair's positioning
- The wooden arm panelling, paired with the diverse fabric options, provide easy-to-clean surfaces
- A variety of design elements available – customise your chair with a variety of fabrics, colour options, and panelling details

A wide selection of colour and fabric options available

Seat dimensions	W 510mm D 550mm H 560mm

- Twin-motor designed for lift and recline functions
- When fully reclined, the user reaches a zero-gravity position
- Back and legrest work together or independently
- Each chair function operates independently to achieve the best position for the resident
- Elevates the feet in any seating position, not just in recline
- Easy-to-use wired controller and side storage pocket
- Full recline position stimulates blood circulation

iClean fabric

Chairs come with a special stain resistant iClean™ fabric, designed with innovative technology that creates a barrier of protection to repel spills before they turn into stains.

Every inch of fabric is completely immersed in a stain resistant solution which guarantees every single fibre has been treated, leaving a concentrated barrier of protection but still keeps the fabric soft and luxurious.

Stain resistant

Innovative technology surrounds each fiber, repelling spills before they turn into stains

Soft to touch

Luxurious feel and exceptional comfort, available in a variety of colors and patterns

Easy-to-clean

For most spills, simply blot with a paper towel. For tougher spills, use a mild soap and water mix

Three year warranty

Quality-backed to stay soft and beautiful

- The headrest is padded and incorporated into the backrest
- Armrest and back support are ergonomically shaped
- Ergonomic handles
- Side protection from the bucket seat is higher laterally and therefore gives the user better lateral stability
- Footrest is softly padded, rounded and adjustable
- Flame-retardant synthetic leather cover – does not wrinkle and is washable
- Extremely low entry position makes it easier to transfer patients
- 125mm swivel castors

Ella care chair

COLOUR OPTIONS

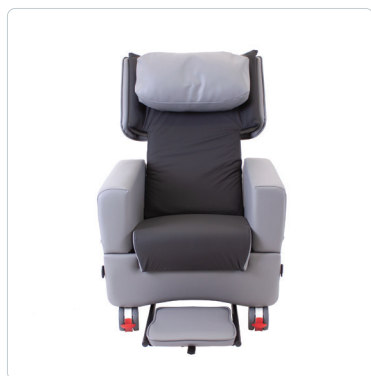

- Baltic

Code: 47000

Safe working load	150kg
Overall dimensions	W 670mm L 880mm H 1160 – 1210mm
Seat dimensions	W 430mm D 430mm H 485 mm
Leg rest dimensions	W 670mm L 460mm H 560mm

- Mechanical adjustment of the backrest and the sitting position using a gas pressure spring
- Ergonomically shaped backrest that gives the necessary support to the spine (adjustment angle of 15 degrees in total)
- Automatic adjustment of the seat angle when adjusting the backrest
- Durable steel frame with adjustable back and seat sections
- Robust and resilient leg rest, padded, made of solid foam
- Legrest is attached to the seat, with a fastening buckle, no slipping
- Ergonomically positioned push handles
- Four smooth-running castors for better mobility, two parking brakes

HydroCare® chair

ACCESSORIES

HydroCare® legrest

- Legrest has a foam topper for basic pressure redistribution
- Can be attached for extra security and portering

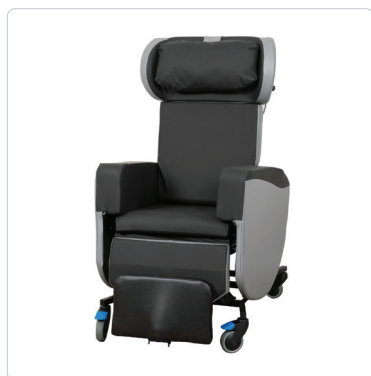

Code: 66925

Code: 66900

Safe working load	160kg
Overall dimensions	W 670mm L 810mm
Seat dimensions	W 430mm D 370 – 510mm
Seat height	440mm
Armrest height	210mm

- Back angle recline: Adjusts the angle between the chair seat and back, which can be used to create a comfortable hip position
- Adjustable seat depth and angle: The seat depth and angle can be easily adjusted to suit each individual. This ensures correct pelvic alignment, prevents a tilted sacral sitting posture and prevents pressure related skin damage

MultiAdjust chair

ACCESSORIES

MultiAdjust lateral supports

- L-shaped pads to provide simple lateral support

Code: 66927

Pressure care: comfort and safety for everybody

Pressure injury n.

An area of localised cellular damage to the skin and underlying tissues caused by pressure, shearing and friction or a combination of these forces. Pressure injuries (also known as bedsores, pressure sores, decubitus ulcers) are areas of localised damage to the skin and underlying tissue due to unrelieved and prolonged pressure, shear, or friction.

Pressure injuries: a clinical insight

Every day, without thinking, people make hundreds of subtle postural adjustments that stave off problems arising from inactivity. But for people immobilised by old age, injury, illness or paralysis, pressure injuries are a constant threat.

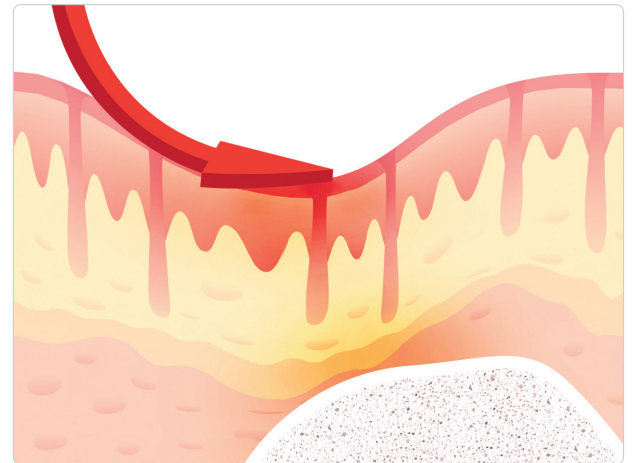

Pressure injuries are usually found on bony parts of the body but can occur almost anywhere that pressure has been applied over a period of time. They are generally found where bones are close to the skin or where the skin presses against a firm surface, such as a mattress.

How can pressure injuries be prevented?

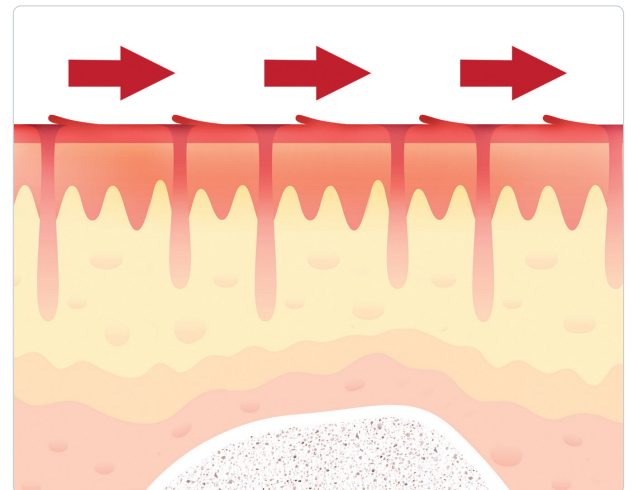

Pressure injuries can develop quickly, progress rapidly and can be difficult to heal. Key preventative measures can maintain the skin's integrity and encourage healing. This is why specialised therapeutic surfaces are vital: specialist cushions, mattresses and positioning aids can help protect vulnerable areas or relieve pressure on an existing injury.

Shear and friction

Shear is a parallel load, forcing the skeleton to slide forward against the resistance created between skin and its contact surface. It causes a restriction in blood flow to the soft tissue and also causes damage to the soft tissue itself.

Friction is a force created by two contact surfaces moving across one another which removes the top layer of skin.

Support surfaces that are designed to help

Pressure redistributing support surfaces are designed to either increase the body surface area that comes into contact with the support surface, or to sequentially alter the parts of the body that bear load, helping to reduce shear and friction.

The right support surface reduces pressure injuries through:

Envelopment

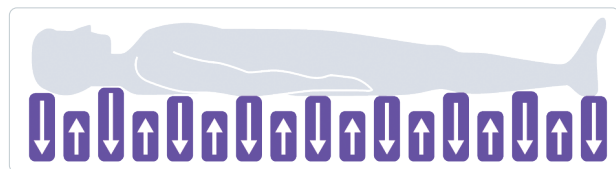

Immersion

Alternation

An active (powered) support surface

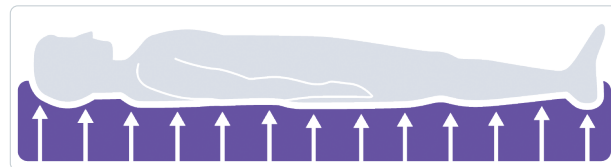

An alternating air mattress redistributes pressure through its cyclical cells, which inflate and deflate several times each hour. This provides a form of treatment and cure for pressure injuries by maintaining and stimulating the flow of blood and lymphatic fluids, providing essential oxygen to the tissue, and removing metabolic waste.

Air mattresses (overlay or full mattress) should be used for the following residents:

- At high risk of developing a pressure ulcer and frequent manual repositioning is not possible. For example, if they can't tolerate it or have a high level of pain when manual repositioning occurs
- Have current skin breakdown/and or pressure injuries

A reactive (non-powered) support surface

These support surfaces can help prevent a pressure injury by creating a balance of immersion and envelopment. This ensures the pressure is evenly distributed and spread away from the areas of bony prominence.

Different types of support surfaces include:

- Positioning aids
- Foam and air cell cushions
- Foot, heel and limb protectors
- Foam, hybrid and air mattresses

Finding the right pressure care support surfaces just got easier

Find our easy-to-follow guides under Resources at cubro.co.nz

Mediflex® mattress

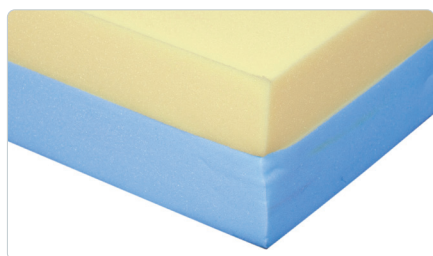

Code: 1660

Code: 1661

Size	Single	Super single
Overall dimensions	W 900mm	W 1100mm
	L 1980mm	L 1980mm
	H 150mm	H 150mm
Safe working load	120kg	120kg

- Deep castellations help the mattress conform to the contours of the user and the bed
- Low density heel zone offers maximum pressure relief and gentle support for the vulnerable heel and ankle area
- Enhanced comfort and pressure redistribution
- Foam side borders assists transfers and helps to prevent roll out
- Breathable, waterproof, antibacterial and bi-elastic polyurethane cover
- High frequency welded seams and concealed zip for infection control

Posture-temp® mattress

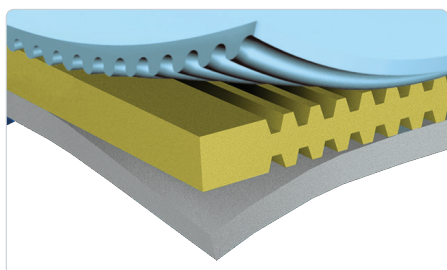

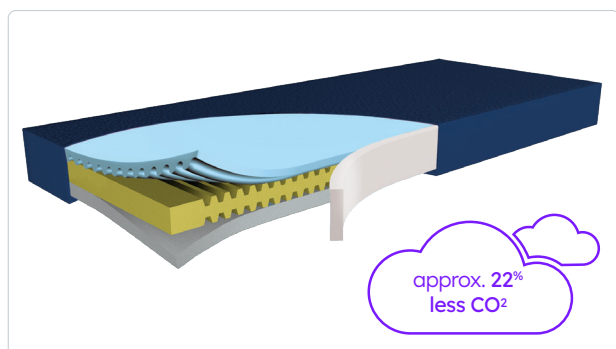

Code: 987

Code: 994

Size	Single	Super single
Overall dimensions	W 900mm	W 1100mm
	L 2000mm	L 2000mm
	H 150mm	H 150mm
Safe working load	120kg	120kg

- Viscoelastic foam reduces interface pressure and conforms to the users' weight to redistribute pressure
- Designed to reduce shear and friction
- The bi-elastic waterproof cover is breathable, stain-resistant, fire-resistant, anti-allergenic and has antimicrobial properties
- Concealed zip and high-frequency welded seams provide superior infection control and help prevent the ingress of fluid and bacteria

Greenline® hyper-foam mattress

	Code: 2256	Code: 2258	Code: 2257

Overall dimensions	W 880mm L 1960mm H 150mm	W 1000mm L 1960mm H 150mm	W 1100mm L 1960mm H 150mm
Safe working load	150kg	150kg	150kg

- Suitable up to stage 4 pressure injury (EPUAP)
- ECO LAST® foam is a specially developed hybrid foam, with a more open cell structure to ensure improved air circulation which creates an optimal microclimate
- Made of ECO LAST® foam which takes approx. 22% less CO₂ to produce than a conventional decubitus therapy mattress
- The bi-elastic waterproof cover is breathable, stain-resistant, fire-resistant, anti-allergenic and has antimicrobial properties
- Infection control approved with a concealed zip and high-frequency welded seams providing a strong barrier that helps prevent the ingress of fluid and bacteria
- The cover is easy to clean and disinfect and can be autoclaved
- ECO LAST foam technology ensures longer durability
- Advanced pressure care
- Supersoft zone for head and heel relief
- Three-layered hyperelastic foam core (with longitudinal and diagonal intersections)
- Firm edges provide stability

OPTION AVAILABLE

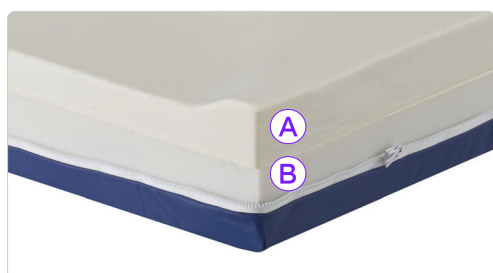

Greenline® hyper-foam mattress with EVAC cover

	Code: 2256-EVAC	Code: 2258-EVAC	Code: 2257-EVAC
Size	Single	King single	Super single
Overall dimensions	W 880mm L 1960mm H 150mm	W 1000mm L 1960mm H 150mm	W 1100mm L 1960mm H 150mm
Safe working load	150kg	150kg	150kg

- Decubitus therapy mattress with evacuation function
- Safety belts with quick release buckle
- Rescue handles on cover
- Special sliding material at the bottom
- Ultrasonically welded seams
- Zipper cover
- Waterproof but breathable incontinence cover
- PU cover:
 - Removable
 - Washable up to 95°C
 - Disinfection by wiping
 - Disinfectant-proof*3
 - Suitable for disinfection with chlorine*3

Alova® multi-support mattress with heel relief

Ⓐ Top layer

Softer, 60mm moulded viscoelastic foam for comfort and pressure reduction

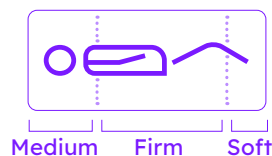

Ⓑ Base

Denser, 80mm polyether foam for stability and to prevent bottoming out

Integrated heel contour

Reduces pressure on the vulnerable heels

Three density zones:

Medium at the head, firm in the sacral area, soft for the feet

Code: 1960

Size	Single
Overall dimensions	W 880mm L 1960mm H 140mm
Safe working load	150kg
Foam density: Top layer	(60) > 75kg/m ³
Foam density: Base layer	(80) > 28kg/m ³

- Designed for prevention and healing of pressure injuries
- Three different support zones surfaces for the head sacral area and feet
- Integrated heel contour to take extra pressure off the feet
- Removable Promust polyurethane heavy duty waterproof cover is washable to 90°C

NOVA foam multi-support king single mattress

Code: 1963

Size	King single 1000mm
Overall dimensions	W 1000mm L 1960mm H 140mm
Safe working load	160kg

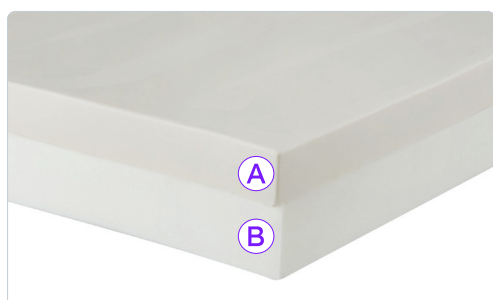

- Complies with the general requirements of Medical Devices
- Cover PROMUST HIP with zipper
- Regulation (EU) 2017/745
- Moderate wash up to 90°

Alova® multi-support mattress with heel relief - XXL 1200mm

Code: 1964

Size	XXL 1200mm
Overall dimensions	W 1170mm
	L 1960mm
	H 170mm
Safe working load	270kg
Foam density: Top layer	(70) > 75kg/m ³
Foam density: Base layer	(100) > 42kg/m ³

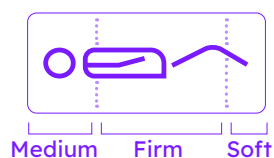

Ⓐ Top layer

Softer, 60mm moulded viscoelastic foam for comfort and pressure reduction

Ⓑ Base

Denser, 80mm polyether foam for stability and to prevent bottoming out

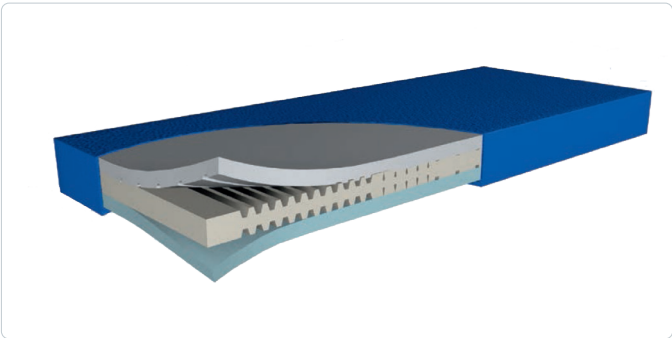

- Designed for prevention and healing of pressure injuries
- Three different support zones surfaces for the head sacral area and feet
- Removable Promust polyurethane heavy duty waterproof cover is washable to 90°C
- XXL size suitable for bariatric residents, with a sleeping surface width of 1200mm

Three density zones:

Medium at the head, firm in the sacral area, soft for the feet

Maxx® Bariatric Mattress - Super single

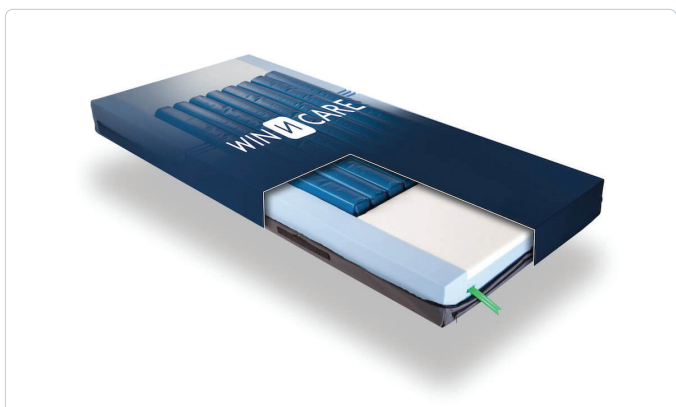

Code: 1556

Size	Super single
Overall dimensions	W 1100mm L 2000mm H 180mm
Safe working load	250kg

- Three-layered hyperelastic foam core with longitudinal and diagonal intersections
- Optimum pressure relief and minimum shear force (below 2.4kPa pressure)
- Super soft zones for head and heel relief
- Two-way stretch, breathable and waterproof with ultrasonically welded seams and a concealed zip
- Cover is chemically and thermally treated according to the directives of the Robert Koch Institute and is a virus and bacteria proof
- Easy clean and care Polyurethane-Tex cover can be removed and washed up to 95°C (disinfectant cleaning and autoclavable)

Flexi Lite hybrid mattress

Flexi Lite pump

- Pressure adjustment for optimum comfort
- External, easy replacement control unit filters
- Audible low pressure alert
- Alert mute
- Cycle fault audible alert
- Control panel lock
- 3 therapy modes; static, alternating and constant low pressure

Code: 2290

Code: 2292

Size	Single	Super single
Overall dimensions	W 880mm	W 1100mm
	L 1950mm	L 1950mm
	H 150mm	H 150mm
Safe working load	222kg	222kg

- Suitable for patients up to, and including, very high risk of developing a pressure ulcer
- 3-zoned surface delivers effective pressure redistribution and unrivalled comfort in static, dynamic & constant low pressure therapy modes
- Combines modern foam technology with 'Figure 8' air cell designs
- 150mm depth
- 13 fully alternating air cells (5 heel cells, 8 torso cells)
- Static head section
- Durable PU air cell construction
- Welded, Crib 7 multi-stretch, waterproof and vapour permeable cover
- Hinged profile design
- Machine washable cover up to 95°C
- Firmed edges to enable patient transfer
- Can be used with or without pump

Smartline Plus 5 alternating air mattress overlay

- A Head zone** 
Three static air cells as a comfort pillow
- B Sacrum area** 
17 air cells alternate in a 1-in-2 cycle

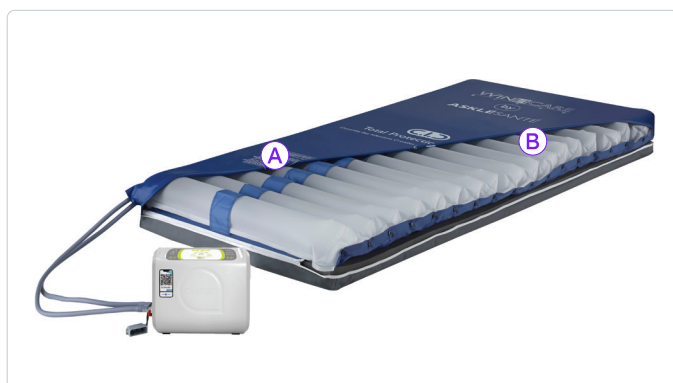

Code: 9500

Size	Single
Safe working load	160kg
Overall dimensions	W 880mm L 2000mm H 130mm
Pump dimensions	W 280mm D 160mm H 100mm
Number of cells	17
Alteration	Type: 1 in 2 Cycle: 10 min
Air output	8 litres/min
Pressure range	20mm Hg - 55mm Hg

- Overlay system to be used with any conventional mattress
- Bi-elastic protection cover with PU coating, highly breathable, slip-retardant and water repellent
- 360° zipper
- Static head cells form a pillow section
- TPU coated nylon air cells
- CPR emergency value pull tag
- Transport function with quick connector
- LED weight setting indicator
- Four fixation straps to secure overlay to mattress
- Detachable power cable

Axtair One Plus® alternating air mattress

18 air cells alternate in a 1-in-2 cycle

50mm polyether foam located in a separate compartment

A Servicing reminder

Visual indication

B Dynamic mode

Alternating pressures prevent prolonged vascular compression that can lead to pressure injuries

C Seating position adjustment

For use when the bed is profiled

Patented system of automatic and continuous calculation of inflation pressure according to patient's morphology, no manual input required

Code: 1950-1

Size	Single
Safe working load	30kg - 165kg
Overall dimensions	W 880mm L 1950mm H 170mm
Pump dimensions	W 250mm D 115mm H 220mm
Number of cells	18
Alteration	Type: 1 in 2 Cycle: 9 - 14 mins
Air output	7 litres/min
Sound output	<35 dBA

- Comfort whatever time of day. The seated position adjustment and comfort adjustment means that the pressure in the mattress can be changed to suit the user, whether they're sleeping, eating or reading.
- Eco-designed to minimise the impact on the environment
- Visual and audible alarms
- Indication for servicing
- Transport plug: system for opening and sharing 2 air channels (autonomy of 8 hours)
- Pump: 1 therapeutic mode: dynamic (technology based on alternating pressure 1 cell in 2)
- Comfort settings: customisation of comfort and seating position
- Serial number on the pump's back, simplified instruction and QR code on both sides
- 50mm polyether foam base
- Covers: made of Promust Polyamide mesh coated polyurethane/ polycarbonate
- Non-slip base
- Welded seams
- Mattress: 18 removable and independent Polyurethane Ether cells of 12 cm therapeutic air
- Therapeutic efficacy for early stages of pressure ulcers
- Accessible CPR emergency valve
- Easy to use for caregivers
- Machine washable up to 60°C
- Compliant with new regulations
- Very quiet pump

Axtair Automorpho® Plus alternating air mattress

A Head zone 
Two static air cells fitted with a comfort pillow

B Sacrum area 
12 air cells alternate in a 1-in-2 cycle

C Foot zone 
Four independent heel relief air cells

D Base 
50mm polyether foam located in a separate compartment

OPTION AVAILABLE

Foam density	18kg/m ³	18kg/m ³
Sound output	<35 dBA	<35 dBA

- Patented system of automatic and continuous calculation of inflation pressure according to patient's morphology, no manual input required
- Comfort adjustment: changes the cell pressure to suit the user
- Three modes: dynamic, static low pressure, care
- 120mm high, removable and independent cells in three therapeutic zones: head, sacrum area and foot zone
- Foam base for comfort and to prevent "bottoming-out"
- Base layer: 50mm polyether foam located in a separate compartment
- Foot zone: four independent heel relief air cells
- Seating position adjustment: for use when the bed is profiled
- Accessible CPR emergency valve
- Servicing reminder: visual indication
- Cover is made of PROMUST CIC (Cross Infection Control). Polyamide mesh coated polyurethane/polycarbonate with added silver ions fitted with a non-slip base
- Transport plug with system for opening and sharing two air channels. This provides autonomy of 8 hours
- Machine washable up to 60°C
- Compliant with new regulations

Quiet and supportive for a good night's sleep:

Polyurethane cells equal a comfortable and silent night and have a softer feel than traditional air mattresses

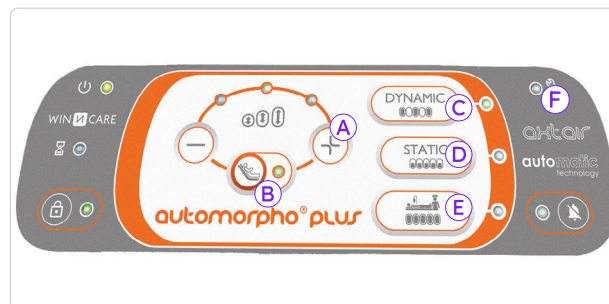

Next generation pump

Durable and quiet, with users who had previously not tolerated a pump accepting the Axtair Automorpho's quiet next generation pump

Patented inflation system

The pump features a patented system of automatic and continuous calculation of inflation pressure according to the occupant's morphology

Ⓐ Comfort adjustment

Changes the cell pressure to suit the user

Ⓑ Seating position adjustment

For use when the bed is profiled

Ⓒ Dynamic mode

Alternating pressures prevent prolonged vascular compression

Ⓓ Static low pressure mode

For people who are immobilised or have wounds, or used to wean the patient from alternation to a static support

Ⓔ Nursing mode

For handling, some medical care and transfers. It gives the maximum inflation for a stable surface

Ⓕ Servicing reminder

Visual indication

Axtair XXL alternating air mattress

- A Sacrum area** 10 alternating air cells with a static air base to ensure stability and to prevent bottoming out
- B Head zone** Two static air cells fitted with a comfort pillow
- C Foot zone** Five independent heel relief air cells
- D Cervico-dorsal zone** Four air cells
- E Firm side border** Dense foam to facilitate transfers

Code: 1969-1

Size	XXL
Safe working load	100kg - 270kg
Overall dimensions	W 1170mm
	L 1950mm
	H 205mm

	H 220mm
Alteration	Type: 1 in 2
	Cycle: 9 - 14 mins
Air output	7 litres/min
Number of cells	21
Cell height	200mm

- Three modes: dynamic, static low pressure and nursing mode
- Four therapeutic zones: head, cervico-dorsal, sacrum area and foot zone
- Firm edge for stability when lifting and transferring
- CPR emergency valve for deflation in less than 15 seconds
- Visual and audible alarms
- Patented system of automatic and continuous calculation of inflation pressure
- Transport plug for opening and sharing two air channels (autonomy of eight hours)
- Sacrum area: 10 alternating air cells with a static air base to prevent bottoming out
- Head zone: two static air cells fitted with a comfort pillow
- Foot zone: four independent heel relief air cells
- Cervico-dorsal zone: four air cells alternate in a 1-in-2 cycle
- Seating position adjustment for use when the bed is profiled

Suitable for large users

The extra width, high safe working load and firm side borders makes this mattress suitable for larger users

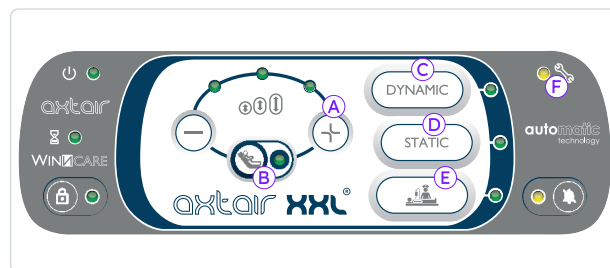

Patented inflation system

The pump features a patented system of automatic and continuous calculation of inflation pressure according to the occupant's morphology

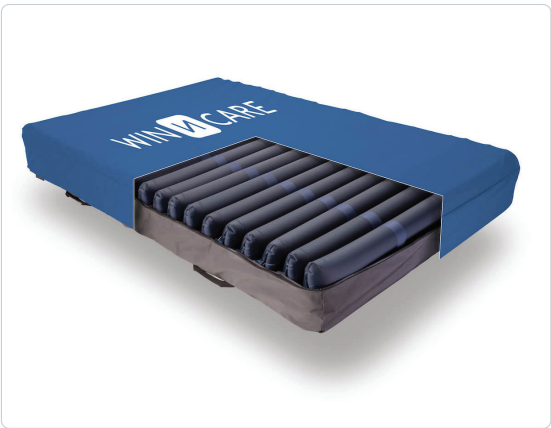

Supportive for a good night's sleep

The cell-in-cell design of the sacrum area polyurethane air pockets means there is always a static air base to support the user during the alternations

- Ⓐ **Comfort adjustment**
Changes the cell pressure to suit the user
- Ⓑ **Seating position adjustment**
For use when the bed is profiled
- Ⓒ **Dynamic mode**
Alternating pressures prevent prolonged vascular compression
- Ⓓ **Static low pressure mode**
For people who are immobilised or have wounds, or used to wean the patient from alternation to a static support
- Ⓔ **Nursing mode**
For handling, some medical care and transfers. It gives the maximum inflation for a stable surface
- Ⓕ **Servicing reminder**

Cleveland mattress - Super single

The Cleveland Air Mattress was designed with the complex, heavy-duty user in mind. This system is ideal for not only the prevention but also the treatment of complex pressure ulcers, especially in larger patient groups.

The 215mm transverse cell construction provides support when it's most needed. The mattress comes with a comfortable, multi-stretch, antimicrobial, welded cover to make it as hygienic as possible. The waterproof, vapour-permeable lining of the cover adds to the comfort of this mattress, while also protecting the air cells. The cover allows air to pass through, cooling the resident and contributing to a more comfortable pressure relief experience. Deeper cell design improves comfort for those who are heavier or more complex, while also providing excellent pressure relief. The pump design allows care staff to select appropriate comfort settings, while remaining simple to use.

Size	Super single
Safe working load	300kg
Mattress dimensions	W 1080mm L 2000mm H 200mm
Cell material	Nylon PU
Number of cells	20
Alteration cycle	1 in 3
Output pressure	10-49 mmHg
Cycle times (mins)	6, 9, 12, 25
Therapy modes	Alternating, Static

- The water resistant, multi-stretch, breathable cover has welded seams and an antimicrobial coating, ensuring a robust defence against water ingress, whilst promoting effective infection control
- Multi-functional digital control unit, enabling a one in three cell alternating cycle, which is recognised as an effective relief cycle for heavier clients
- Easy-to-use
- The large, deep nylon PU transverse cell construction, provides support when its most required
- Full high frequency welded mattress prevents fluid ingress
- CPR rapid deflation valve
- Alternation cycle 1 in 2
- The deeper cell design improves patient comfort
- CPR pull cord, protecting patient safety
- The CPR function aids rapid deflation when medical emergencies occur
- Transport mode, reducing patient discomfort and ensures that the mattress remains stable and doesn't create unnecessary movement or pressure on the patient's body during transportation. This helps prevent discomfort, pain, and potential injury during movement

Notes

Mattress selection guide

For use in the prevention and treatment of pressure injuries.

Risk of pressure injuries
low to medium

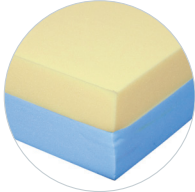

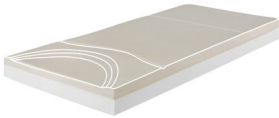

How long does the individual spend in

In bed <15 hours a day, able to mobilise themselves with assistance	In bed >15 hours a day
---	------------------------

Do they have any existing pressure injuries?

No pressure injuries, in good general health	History of pressure injuries or reddened areas

Askle Santé positioning aids

- Designed for superior in bed and seated positioning support and pressure relief
- Micro-beads in self-extinguishable PES, with Vacuum Touch™ that supports stable repartition of micro-beads within the cover
- Cross Infection Control (CIC) cover is resistant to odour, bacteria, fungi and dust mites, while Silver (Ag+) ions limits microorganism developments
- Certified Oeko-Tex class 1 for direct contact with injured skin
- Polyurethane-Polycarbonate coating on nylon mesh for greater durability

Askle Santé positioning aid starter kit

The starter kit includes core positioning aids that can be used in a wide range of applications to achieve full-body alignment and provide maximum comfort. It's a complete system to support correct body alignment and redistribute pressure areas.

Includes:

- 1x Universal positioning cushion (small)
- 1x Cylindrical positioning cushion
- 2x Foot positioning cushion
- 2x Hand positioning cushion
- 2x Circular positioning cushion

MaxXcare Heel pro evolution heel protector

The MaxXcare Heel pro evolution heel protector uses the unique Vicair Smartcell technology to completely offload the heel from pressure, preventing the heel from developing pressure ulcers and allowing existing sores to heal quickly.

Strategically positioned air cells are used to:

- Provide optimal elevation of the heel and ankle
- Offloading the Achilles tendon
- Provide a gradual transition to the calf
- Improve stability
- Protect from pressure and shear
- Available in small, standard and extra large
- Ideal for those at risk of a heel injury or with an existing pressure injury
- Pressure injury risk up to very high

Overhead lifting: safer solutions for your residents, your staff and your facility

We've found the key to successfully reducing injuries and minimising risks, when moving and handling people, is getting the right mix of tools, training, education and culture. Our overhead lifting solutions can help you achieve safer outcomes for residents, staff and your facility.

For the resident:

- Easier positioning minimises the risk of skin tears and bruising
- Using a fixed structure means the transfer is always stable
- Transfers are seamless, dignified and discrete
- If a fall should occur, then overhead lifting can safely recover a resident from where they are in the room
- Speed of care as resident spends less time waiting on availability of equipment

For carers:

- Less strain, decreased physical demand and postural loads
- Minimises the risk of skin tears or injury to both the carer and the resident
- The ease of use creates no physical barriers between the carer and resident resulting in better quality interactions and care
- The system is intuitive and easy to use with a safe and simple sling attachment
- Carers can feel more in control with a safer and simpler transfer
- Time saving as equipment is there, ready to use

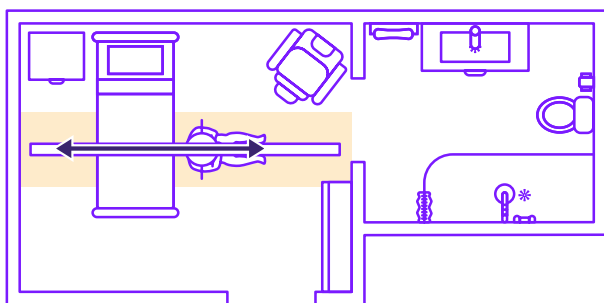

For the facility:

- Less injuries to staff and time away from work
- Quality equipment creates a better workplace and encourages staff retention
- Better clinical outcomes can be achieved
- Bariatric residents can be accommodated more easily as reduced effort is required for transfers
- Less clutter, visually less intrusive and less damage to beds and doors

A track system to suit every situation and location

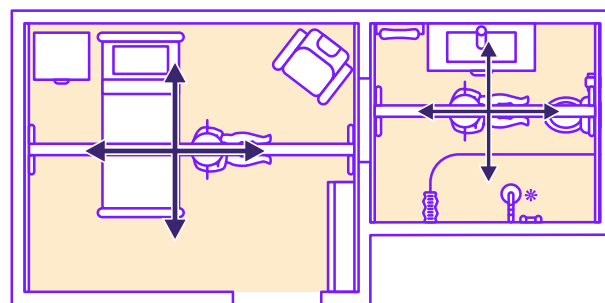

A well-designed rail system is one of the most important considerations for achieving an effective, stable and safe lifting solution.

Full room coverage, without limitations

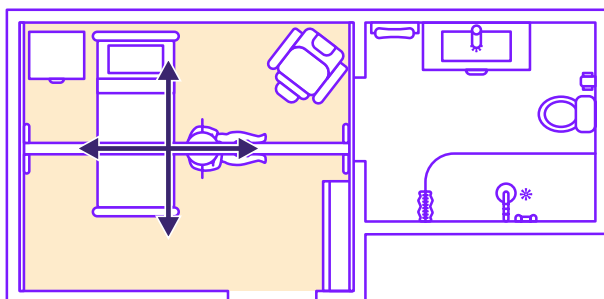

Single rail system

When planning and designing a room, it's important to understand that the layout is limited by where the rail is located. This can limit your personal options for residents and future innovations.

XY system: care room and ensuite

Using clever room connectors, this solution provides full coverage in multiple spaces. Designed to support seamless transfers from a bedroom to an ensuite, this system can also be extended to provide access to common areas.

XY system

The optimal solution is full coverage XY system, that consists of two parallel rails and a traverse beam. This design provides you with greater flexibility in the layout, and bedroom furniture can be moved exactly as you wish. In the case of a fall incident, the XY system can be used to safely recover a resident.

We do the heavy lifting for you

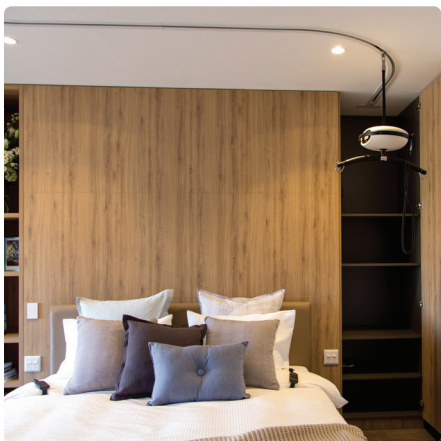

When you choose to work with us, you're choosing to work with an experienced team, with a proven track record of installing safe lifting solutions.

We offer:

- A specialist team that manage the entire process from consultation to installation, to training and ongoing service and maintenance
- Thoughtful design solutions, creating elegance and style
- A track system to suit every situation and location
- An extensive range of product solutions from leading European suppliers

Overhead lifting room configuration options

Room layout options are endless with our range of overhead lifting tracks. We design your overhead lifting solution to suit your facility and careful considerations are made to always allow for superior care for your residents. Talk to us today for more information.

Luna lifter

Portable lifter

Fixed lifter

Luna portable lifter & Luna fixed lifter

Our Luna lifters come in two different options; they can either be fixed onto the track so that they are always there when you need them, or they can be portable and used in more than one room.

The Luna lifter's total flexibility and elegant shape marks a breakthrough in innovative Scandinavian design, making it the preferred choice for aged care use.

- IPX4 protection for safe transfers in wet environments
- Strong, compact unit with a sleek design
- Ergonomic hand controller enables a safe and easy transfer
- Patented hooks on the spreader bar ensure a safe, simple sling attachment
- Easy charging via hand control
- Emergency lowering functions
- Safe working load option of 200kg or 275kg
- Five-year warranty

- ① The discreet design of the Luna lifter enables a seamless blend with the design of the room

- ① Portable weight scale, easily attaches to the Luna spreader bar

- ① Optional charger unit, with wall-mounted docking station

Stellar 170 sit-to-stand hoist

Code: 6420-2

Safe working load	170kg
Lifting method	Electric
Lifting range	min 800mm max 1600mm
Knee support adjustment	min 390mm max 500mm
Base spread method	Electric
Overall dimensions	L 1093mm H 1138mm
Base dimensions	L 952mm H 120mm
Width inside base	min 540mm max 830mm
Width outside base	min 665mm max 920mm

- Compact sit-to-stand hoist with a small turning radius
- An ergonomic, natural lift with a shorter lifting arm and horizontal handles on the side for a more natural grip for the user
- The detachable footplate is flat and wide for the best standing position
- Height and angle adjustable knee supports
- Latest state-of-the-art electronics
- Electrical leg base spread adjustment
- Smooth surface makes it easier to clean and for infection control
- Meets ISO standard 10535
- Emergency stop function located on top for easy access and to avoid unintended activation
- Narrow and stable chassis, which fits through doors with a width of only 700mm
- LED indication on control box with information about battery and charging, service, and system status (overload, emergency stop, etc.)
- An easily accessible handle on top of the battery for easy removal
- Linak actuator and Lift 40+ control box with OneConnect™: Ingress protection against powerful water jets from 1.25mm nozzle at all angles
- Up/down buttons easy to activate on both the front panel and hand control
- Castors: 2x 75mm at front, 2x 100mm braking at rear

- Used for dressing and toileting
- Ideal for users with good upper body control
- High density open weave mesh is durable and quick drying
- Suitable for bathing
- Attachment type: loops

Silva-Supreme general purpose bariatric sling

	Code: 6630S	Code: 6631S	Code: 6632S	Code: 6633S
Size	Narrow, short tucks	Narrow, long tucks	Wide, short tucks	Wide, long tucks
Safe working load	272kg	272kg	272kg	272kg
Sling dimensions	W 1220mm L 750mm	W 1220mm L 750mm	W 1750mm L 750mm	W 1750mm L 750mm
Width across back of shoulders	800 - 1100mm	800 - 1100mm	1200 - 1400mm	1200 - 1400mm

- Two tailoring options for bariatric body types:
 - Short tailoring tucks: More fullness to the fabric giving better neck/head support. For those where the weight is typically above the waist
 - Long tailoring tucks: Provides extra support to the head and upper back area, sling accommodates excess body weight below the waist area
- The tucks give a 'blousing effect', enabling excess weight in the back area to be encompassed within the sling ensuring better back support for the user
- Parasilk on the leg sections for easy application
- Made from structured (heavy-duty) polyester, with a soft double-layer spacer on the leg sections and soft binding for optimum comfort
- Attachment type: loops

i-swim mobile pool lift

Code: 5500

Safe working load	136kg
Overall dimensions	W 640mm
	L 1267mm
	H 1512mm

- Attendant controlled portable lifting device to enable users with restricted mobility to access swimming pools safely
- Swimmer is lowered into the water and can either swim away or be met by their carer in the water if further assistance is required
- Parallelogram lifting structure
- Patented anti-tip and stabilising system
- Up to 40 cycles between charges
- Easy to move
- Battery charger and load indicator included
- Emergency stop button
- Aluminium and stainless steel construction
- Powder coated for durability
- 4 wheels, 2 with brakes

i-swim 2 mobile pool lift

Code: 5501

Safe working load	136kg
Overall dimensions	W 760mm
	L 2510mm
	H1500mm

- Portable lifting device to enable users with restricted mobility to access swimming pools safely
- Designed to be operated independently by the person being lifted or by a carer
- Can be used independently by the user
- Parallelogram lifting structure
- Patented anti-tip and stabilising system
- Handheld controls
- Approx 50 cycles per battery charge
- Easy to move
- Considerably lighter and easier to move than other user operated portable pool lifts
- Aluminium and stainless steel construction

i-swim products comply with the following regulations:

Directive 2006/42/CE Machine Directive

Directive 2004/108/EC EMC Electromagnetic Compatibility

UNI EN ISO 10535 Hoist For The Transfer of Disabled Persons

93/42/CEE Medical Device Directive

Immedia® 3B transfer board

Code: 66438

Safe working load	150kg
Overall dimensions	W 230mm L 770mm

- A stable transfer board with a traditional curved shape
- Support transfers from bed to wheelchair and transfers in and out of the car
- Can also be used for transfers between wheelchair, chair, toilet, shower chair, and commode
- Non-slip surface on the underside

Softech® Slide transfer sheet

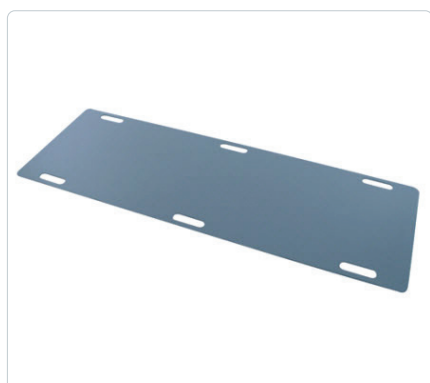

Code: 195

Code: 195XL

Size	M	L
Overall dimensions	W 1100mm L 1400mm	W 1500mm L 2000mm

- Super slippery, low-friction material
- Machine washable

Hull® Transfer board

Code: 193

Safe working load	120kg
Overall dimensions	W 520mm L 1500mm

- Supports smooth transitions and positioning
- Features six large cutout handles that are well positioned to make it easier for carers to hold in an optimal position
- Made from lightweight PVC

Immedia® OneWayGlide tube

Code: 66427

Safe working load	150kg
Overall dimensions	W 450mm L 450mm

- Tubular cushion with a non-slip outer material that grips any surface
- Allows sliding in one direction whilst preventing sliding in the opposite direction
- Can be combined with cotton cover if required

Immedia® MultiGlide glove

Code: 66495

Safe working load	200kg
Overall dimensions	W 200mm L 500mm

- Used for positioning, small re-positioning adjustments, and physical hand checks of anti-decubitus cushions and mattresses
- Multifunctional aid for small transfers

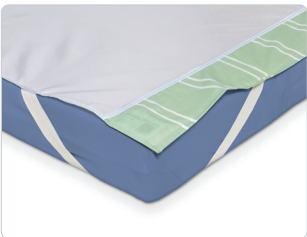

Immedia® Satinsheet in-bed system

- Our new Immedia® SatinSheets is a complete in-bed system for turning and positioning users with dependent needs
- The in-bed system reduces strain on carers' backs and may also reduce the number of carers required

- Ⓐ Immedia SatinSheet 2Direction BaseSheet
- Ⓑ Immedia SatinSheet 4Direction DrawSheet
- Ⓒ Immedia SatinSheet 2Direction pillowcase

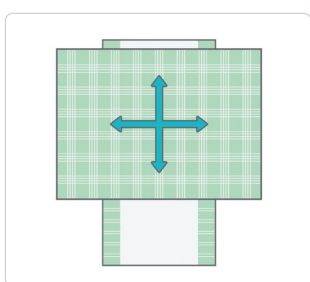

Immedia® SatinSheet 2Direction base sheet

	Code: 66316	Code: 66317
Size	Single	Super single
Overall dimensions	W 850mm L 2000 mm	W 1050mm L 2000 mm
Safe working load	200kg	200kg
Satin area dimensions	W 650mm L 2000mm	W 800mm L 2000mm

- Low friction satin area in centre of the sheet allowing movement from side to side
- Elastic corner straps to fit to the mattress
- Cotton/polyester edge to brake movement and prevent sliding

Immedia® SatinSheet 4Direction bed sheet

	Code: 66322	Code: 66324
Size	Midi	Maxi
Overall dimensions	W 2000mm L 1400mm	W 2000mm L 2000mm
Safe working load	200kg	200kg
Satin area dimensions	W 1470mm L 1400mm	W 1470mm L 2000mm

- Reduces friction in all four directions allowing smooth repositioning in bed
- Sheet to allow movement in four directions
- Cotton/polyester sheet with a satin underside which stays on the base
- Nylon handles can be combined with a hoist for turning

Immedia® positioning wedge

	Code: 66491	Code: 66492
Size	Small	Large
Safe working load	200kg	200kg
Overall dimensions	W 300mm L 530mm H 200mm	W 300mm L 800mm H 200mm

- Supports the user on the side after turning, when resting, or when performing hygiene or wound care, saving the caregiver from maintaining a static holding position
- It can be used alone or in combination with other positioning aids

Pool hoists

Mobile pool lifts

- Aluminium and stainless steel construction
- Powder coated for durability
- 4 wheels, 2 with brakes

i-swim 2 mobile pool lift

Code: 5501

Safe working load	136kg
Overall dimensions	W 760mm L 2510mm H 1500mm

- Portable lifting device to enable users with restricted mobility to access swimming pools safely
- Designed to be operated independently by the person being lifted or by a carer
- Can be used independently by the user
- Parallelogram lifting structure
- Patented anti-tip and stabilising system
- Suitable for inground pools with or without small curbs
- Turning seat enables independent swimming pool access
- Handheld controls
- Approx 50 cycles per battery charge
- Easy-to-move
- Considerably lighter and easier to move than other user operated portable pool lifts
- Aluminium and stainless steel construction
- Seat travels down 810mm

i-swim products comply with the following regulations:
 Directive 2006/42/CE Machine Directive
 Directive 2004/108/EC EMC Electromagnetic Compatibility
 UNI EN ISO 10535 Hoist For The Transfer of Disabled Persons

Hygeolis air purifier

PARTS

Replacement filter

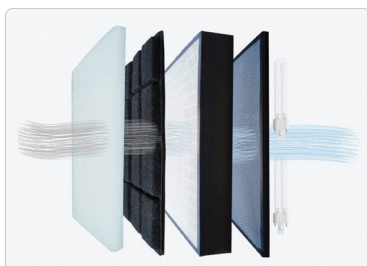

Code: 0580-1019-10

Code: 0580-1019-05

Overall dimensions	H 230mm W 230mm D 190mm
Max treated area	45m ² (per unit)
Max airflow	150m ³ /h
Fan speed settings	3
Noise level	35-52 dB

- Professional anti-odour air purifier to keep small spaces clean and healthy every day
- Helps to prevent the spread of bacteria, micro-organisms and viruses (such as the flu, norovirus and rotavirus) passing between residents, staff and visitors
- Purifies air with biocide filter and a very high density activated carbon filter
- Continuous air circulation: performance throughout the entire volume of the room
- Active oxygen function for deep cleaning provides a thorough treatment in 30 minutes, treating unwanted odours that may be embedded in textiles or carpets
- Remote control
- Discreet, compact and quiet, especially suited for small rooms such as bathrooms, changing rooms and hallways
- Lightweight and easily transportable, can be free-standing or wall-mounted
- Filter service indicator

EOLIS Air purifier

Code: 0580-1015-05

Overall dimensions	H 505mm W 385mm D 230mm
Max treated area	60m ² (per unit)
Max airflow	350m ³ /h
Fan speed settings	5
Noise level	18-52 dB

- Highly effective against all pollutants, micro-organisms and odours
- Specifically developed for intensive use in hospital and aged care environments
- It works by combining a unique medical grade filtration system with controllable and activatable UV-C germicidal lamps
- UVC light is a well-recognised and widely used method of neutralising bacteria and viruses that has been used for over 40 years. It works by breaking down the DNA and RNA of viruses and bacteria so that they can no longer do harm
- Exceptionally quiet with a unique night mode
- Smartphone remote control (IOS and Android)
- Four filters including a EN1822 certified H13 HEPA filter
- Live air quality indicator
- Filter service indicator
- Touchscreen control
- Optional monitoring software available for the simple management of several units
- Compact, yet powerful
- Environmentally friendly

Pulmo-Aide® Compressor nebuliser

↑ Includes a nebuliser kit and 1x adult mask

Code: 805

Overall dimensions	W 260mm D 170mm H 270mm
Max air pressure	≥30PSIG
Compressor free air flow	≥12LPM
Product weight	3.2kg

- Long lasting with an average product life of 10 years
- Can be used for COPD treatment or delivering antibiotics
- Can be used for TOBI (tobramycin solution for inhalation)
- Designed for multiple uses daily
- Unique four-pole motor design extends life of the unit
- Approved by FDA
- In-built compartment for storing parts

Overall dimensions	W 342mm D 304mm H 622mm
Flow rate	0.5LPM – 5LPM
Outlet pressure	8.5 PSIG
Oxygen percentage	1LPM – 5LPM = 90 – 96%
Power consumption	310W average; 275W at ≤1.2 LPM
Product weight	16.2kg

OPTIONS

 Oxygen concentrator humidifier bottle

Code: 5016

ACCESSORIES

Oxygen outlet hose fitting

Code: ZZ0808010

- Oxygen Sensing Device ensures patient safety and reliability for longer service intervals
- Robust high-impact casing provides an extra layer of protection to cope with demands of everyday use
- Protected cannula fitting provides additional safety and recessed humidifier nook to prevent damage
- Audible and visual alarms for low oxygen levels, power failure, high/low pressure, and service required
- Readily accessible controls
- Simple to set up and easy-to-use
- Easy to assemble and disassemble two-piece cabinet for ease of maintenance
- Pressure-compensated flow meter to ensure accurate flow display
- Pressure relief valve and thermal protection on the compressor
- Balanced design, integrated handles on top and side and castors for easy transport
- Intake filter features a translucent back to allow technician to quickly determine if the filter is dirty
- Flame-retardant cabinet
- Three year warranty fully backed by manufacturer in the United States
- Class II: Equipment Double Insulated; Type B Applied Part; Ordinary Equipment, IPX0
- Body and safety standards: TUV approved for 50 Hz only to EN 0601+A1+A2+A13ISO8359:1996/Amd.1:2012
- EMC compliance to EN60601-1-2
- Made in United States of America

10 litre oxygen concentrator

Code: 813

Overall dimensions	W 342mm D 304mm H 622mm
Flow rate	2LPM - 10 LPM
Outlet pressure	20.0 ± 1.0 psi (138 kPa +/- 7 kPa)
Oxygen percentage	2LPM - 10LPM = 87 - 96%
Power consumption	120 vac, 60HZ: 639 watts average
Product weight	19kg

- Capable of delivering 87% to 96% of O₂ purity from 2 to 10 LPM
- Oxygen outlet incorporating a fire protection adapter for added safety
- Visual and audible alarms to indicate power failure, high gas temperature, high pressure, low/high flow, low oxygen and service required
- An auxiliary oxygen port is included which can be used to fill cylinder transfill systems
- Durable and reliable, tested under high temperatures and high humidity
- Bright LED panel for patient controls, with a protected cannula fitting and recessed humidifier nook to prevent damage
- Lockable flow meter that can accommodate up to 15m of oxygen tubing plus 2.13m of cannula
- Made in United States of America

iGo2 Portable oxygen concentrator

Includes two batteries, a carry bag, power supply, power cord and car adapter

Code: 814

Overall dimensions	W 89mm D 218mm H 213mm
Oxygen output	90% +4/-3
Max O ₂ production	1014mL
Measured sound level	<37dBA (setting 2) 20BPM
Battery run time	min 3.5 hours (setting 2)
Trigger sensitivity	0.05cmH ₂ O
Product weight	2.2kg

- SmartDose™ Technology automatically adjusts oxygen production and delivery in real time to meet patient demand
- Robust, high-quality casing provides an extra layer of protection to cope with demands of everyday use
- For more active patients, iGo2 portable oxygen concentrator is lightweight (2.2kg) and easy-to-carry, in its convenient carry case, making it an ideal option for wheelchair, walker and other mobility or assisted walking device users
- Federal Aviation Administration (FAA) compliant for in-flight use
- Patient user friendly — battery, LCD screen and unit controls are located on top of the concentrator and easily accessible while in the carry case
- Unmatched converter trigger sensitivity (0.05cmH₂O)
- Three year warranty fully backed by manufacturer in the United States
- Sound pressure level meets ISO 80601-2-69:2014, sound power level meets ISO 80601-2-69:2014, sound pressure level range of alarm IEC 60601-1-8:2012)

Suction unit

Code: 806

Overall dimensions	W 200mm D 235mm H 215mm
Vacuum range	80 – 550mmHg
Container capacity	800ml
Product weight	2.9kg

- A high performance suction unit with up to 550mmHg vacuum and 27 lpm flow, providing discrete suction on the go
- Battery or mains powered - rechargeable battery has approx. 60 mins run time. Mains power cord included
- Compact, lightweight design for portability
- Convenient, easy-to-clean 800ml canister
- Easy-to-read, built-in regulator and vacuum gauge for quick, accurate adjustments
- Meets ISO suction and emergency standards
- Comes with a carry case
- Comes with one spare filter, replacement filters available

- Click style adjustment
- 8LPM

Spencer® Oxygen bottle trolley

Code: 638

Tray dimensions	W 230mm D 200mm
Overall height	1010mm

- Used to transport oxygen bottles easily
- Includes safety strap
- Fits either D or E size oxygen bottles

Genius™ 3 tympanic thermometer with base

Code: 4305

Accuracy	+/- 0.3°C
Ambient operating range	16°C – 33°C
Temperature measurement range	-25°C – 42°C
Storage temperature range	-25°C – 55°C
Battery life	(3x AAA batteries) 15,000 temperatures

ACCESSORIES

Probe covers
Pack of 96

Code: 4306

- In-ear thermometer that is quick, dependable and accurate
- Peak Select technology takes multiple readings and selects the highest temperature within one to two seconds to display
- Single-use non-touch probe covers available to prevent infection and cross-contamination
- Fits in an existing base and comes with silicone eject button cover
- Comes with a plastic base with an IP22 rating for protection against dust and liquid ingress
- Built and tested according to IEC60601-1, CAN/CSA C22.2 No. 601.1, and EN60601-1-2 Standards
- Can be re-calibrated for annual compliance
- Three year warranty

Spencer® Fingertip pulse oximeter

Includes protective silicone cover,
canvas carry case and hanging cord

Code: 1405

Overall dimensions	W 32mm
	L 58mm
	H 34mm
SpO2 measurement range	70 – 99%
Pulse rate range	30 – 232bpm

- Small and lightweight design
- Can be relied upon for fast and accurate measurement
- Accommodates wide range of finger sizes
- Displays SpO2, pulse and pulse bar
- Low power consumption, auto power-off design
- Displays battery status bars and has low battery alert
- Complies with IEC60601-1-2 for electromagnetic compatibility Class B
- FDA, CE, TUV, MD certified
- Uses AAA batteries

BT-720 vital signs monitor

Includes medium sized cuff and a mobile cart with accessories basket

Code: 4600

Display	4.3" colour touch screen
Battery run and charging time	8 hours
SpO2 perfusion index	0.05 – 20%
Pulse rate range	25 – 250bpm
Cuff circumference	270 – 350mm
NIBP	
Systolic range	40 – 270mmHg
Diastolic range	10 – 210mmHg
Mean range	20 – 230mmHg
Mobile cart	
Load capacity	30kg
Base diameter	580mm
Adjustable height	740 – 1100mm
Package weight	7kg

- Measures SpO2, pulse, NIBP, Masimo SpO2
- Displays a wide range of information including perfusion index and bar graph display
- Includes short and long trend graph and table display
- Audio and visual alarm with an adjustable alarm limit and pitch tone variation for pulse rate
- Over eight hours continuous working on rechargeable lithium-ion battery
- SD card slot for easy software upgrades
- Specialised PC software for data review and analysis
- HL7 export to clinical information systems

Digital chair scale

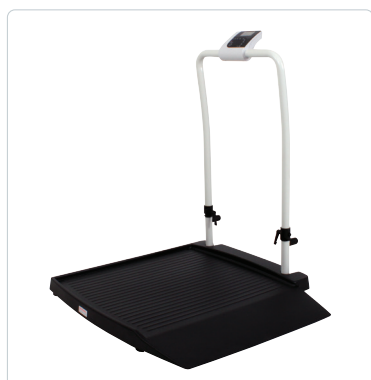

Code: 781

Overall dimensions	W 630mm D 850mm H 965mm
Seat size	W 430mm D 420mm
Graduation	0.1kg
Safe working load	300kg

- Efficient solution for mobility challenged users
- Movement compensation technology, useful for people with involuntary movement as it takes an average weight from a short time period
- Platinum indicator five digit 3/4" LCD
- Tare weight option, re-weigh, auto hold, kg/lb option
- BMI (body mass index) function
- The rear wheels come with braking castors for stability and security
- Updatable firmware
- Auto power off
- Low battery indication
- 6x AA batteries (supplied)

Digital scale platform

Code: 782

Platform size	W 840mm L 970mm H 820mm
Safe working load	310kg

- Roll-on ramp access and non-skid ridged platform guarantees safe weighing and designed for weighing mobility challenged people
- Movement compensation technology, useful for people with involuntary movement as it takes an average weight from a time period
- Tare weight button, re-weigh, auto hold, kg/lb option
- BMI (body mass index) function
- Platinum indicator six-digit 1" LCD
- Updatable firmware
- Low battery indication
- Auto power off
- RS232 communication port
- 6x AA batteries (supplied)

Ergolet® Weigh scale

Code: 6398

Overall dimensions	H 300mm W 580mm
Safe working load	300kg

- Portable and fits to any Ergolet full body lifter, and many others with a standard two point spreader bar
- On/off/zero/tare button
- Hold button
- MDD class 1 weight unit

KaWe Aneroid sphygmomanometer

Code: 4421

Dial diameter	60mm
Cuff circumference	Adult size 275 – 365mm

- One tube-system that supports simple one-handed operation One-piece cuff with bladder made of 70D Nylon fabric, easy cleaning
- Extremely resilient: up to 50,000 uses
- Protection against over-inflation
- Shock protected in accordance with DIN EN ISO 81060-1
- Bio-compatible in accordance with DIN EN ISO 10993
- Latex free

KaWe Mobile aneroid sphygmomanometer

Code: 4422

Adjustable height	min 850mm max 1300mm
Hose range	3000mm
Gauge diameter	150mm
Pressure range	0 – 300mmHg

- Aneroid blood pressure measuring device
- Stable five-foot roller stand made of high-quality stainless steel and sturdy plastic juncture for the feet
- Large gauge with thin, red dial for exact measurement readings
- One-piece cuff with rubber bladder
- Numbered instrument dial reduces the risk of parallax error
- Complies with DIN EN ISO 81060-1
- Incorporated cuff holder
- 50mm double castors: two locking castors, two safety castors and one anti-static castor

KaWe Cuff and single tube system

Code: 4425

Code: 4426

Size	Adult	Large adult
Arm circumference	275 – 365mm	355 – 460mm

- One-tube system
- One-piece cuff with bladder made of 70D nylon fabric which is all latex free
- Easy cleaning
- Bio-compatible in accordance with DIN EN ISO 10993
- Extremely resilient: up to 50,000 uses

KaWe Cuff and double tube system

Notes

Compactor shelving and chrome wire shelf units

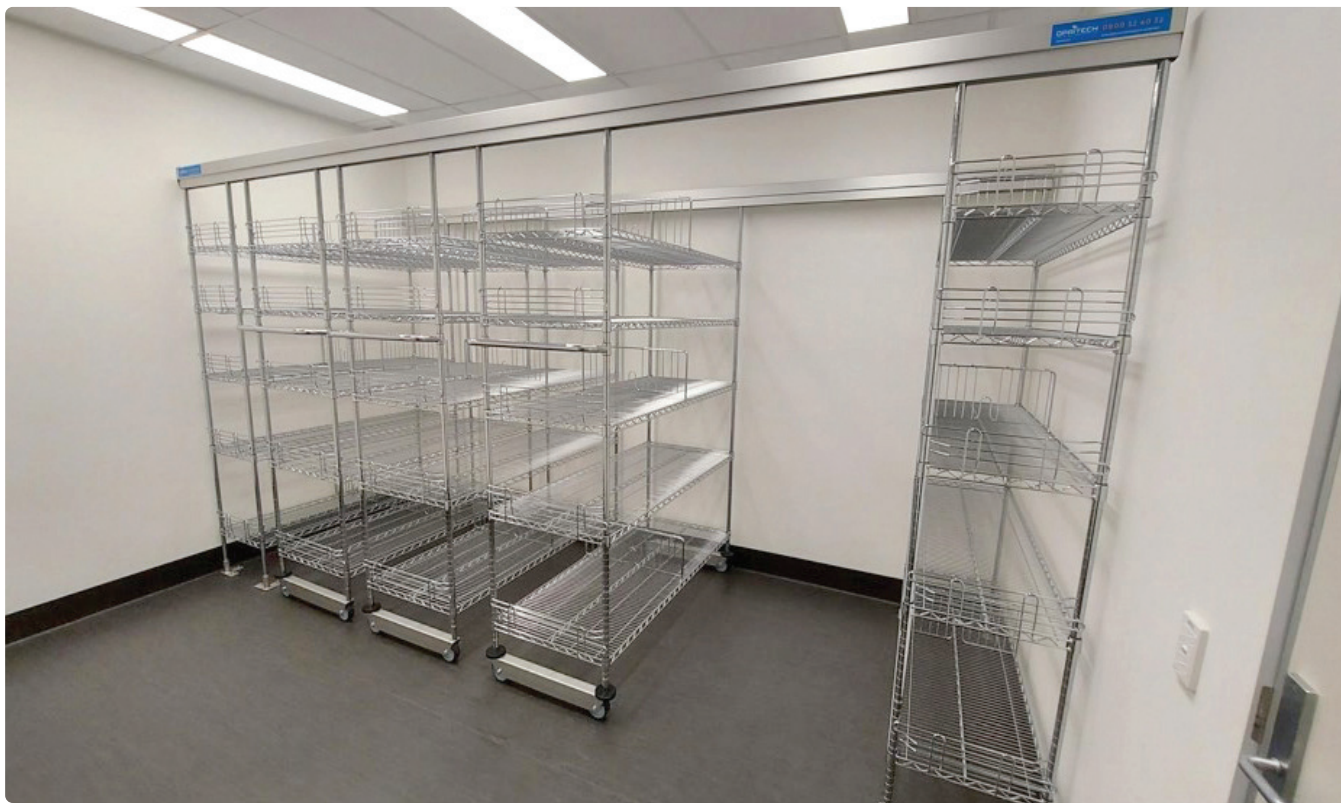

Chrome wire shelving is an ideal sterile solution for Aged Care environments with clean edges that won't snag or tear and open mesh that doesn't get dusty and is easy to wipe clean.

- Chrome wire shelving are designed and manufactured to meet standards for sterile stock storage AS/NZS 4187
- Large range of heights and adjustable shelves available to optimise your storage space

Chrome wire shelf units

Chrome wire static shelf units come with strong shelves making it ideal it an ideal bulk storage solution.

- Can be fitted with castors for movable storage
- Dividers create multiple storage compartments on one shelf
- Shelves can be adjusted to suit storage requirements

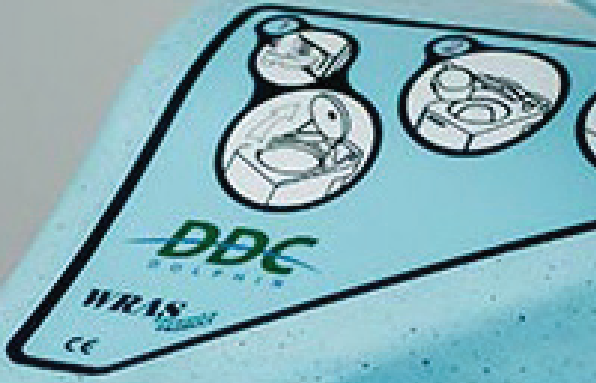

Compactor shelving

Chrome wire compactor units offer a high density mobile storage system that optimises the use of your storeroom. It is ideal for dry storage areas, particularly in environments where cleanliness is essential. Any number of mobile units can be installed to run along the tracking rails between the two static end units.

- A large selection of shelf widths and depths ensure the Compactor can be fitted to any storeroom
- Mobile and static mid units can be added or removed as required
- Dividers create multiple storage compartments on one shelf
- Ball-bearing wheels and top guides ensure the system will not bind up and is easy to roll even when very heavily loaded
- Shelves can be adjusted to suit storage requirements
- No floor tracks so it limits any obstructions

Build it to your needs

Cubro has a range of shelving solutions available - Talk to one of our team today.

Code: 9112

- Reduce cross contamination of infectious materials and minimise the risk of ward outbreaks, keeping staff and patients safe
- Rapid 10-minute washing disinfection cycle – eco-friendly and cost effective
- Largest capacity machine to suit very high usage healthcare environments – can clean up to 3 bedpans and 3 urine bottles per cycle
- Incorporates the latest technological advances and able to achieve thermal disinfection levels in line with NHS periodic testing guidelines
- Extremely thorough wash performance, eliminating 99.99% of known bacteria
- Hands-free open technology – using a foot plate to minimise cross infection and provide ease of use

Pulpmatic Eco+ Medical pulp macerator

Code: 9114

- Our most economical machine, using very little water and energy to operate
- Reduce cross contamination of infectious materials and minimise the risk of ward outbreaks, keeping staff and patients safe
- Disposes of up to 4 pulp items per cycle – suitable for medium demand environments
- Save clinicians' time and increase productivity by eliminating the need for cleaning of reusable items
- Reduce hospital budget spend with low operating costs and prevention of ward shutdowns due to infections
- Automatic drain flush – can be programmed during low use times to limit the build-up of stagnant water and remove the possibility of Legionnaires' disease

Notes

Walking and mobility aids

Walking frames	178
Gutter walking frames	178
Specialist mobility equipment	179

Mobilis® Quad walking frame

Code: 1836G

Safe working load	120kg
Overall dimensions	W 610mm D 660mm
Handle height	min 860mm max 920mm
Inside width	445mm
Folded depth	210mm
Seat size	W 350mm D 350mm
Seat height	530mm
Product weight	7.5kg

OPTIONS

 Folding tray

Code: 1945

- Lightweight aluminium frame
- Lock'n'load function fastens the walking frame into folded position, making it easier to transport
- Easy to adjust with a "one touch" hand brake system
- Padded seat
- Storage bag included
- Large 200mm front castors and rear wheels, suitable for indoor and outdoor use

Nomad® Gutter walking frame with handbrakes

Code: 1885HB

Safe working load	190kg
Overall dimensions	W 605mm D 750mm
Handle height	min 1000mm max 1400mm
Inside width	480mm
Width between centre of gutter troughs	min 250mm max 425mm
Folded depth	400mm
Product weight	8kg

- Ideal for individuals who have arthritis or a broken hand or wrist; forearms bear the weight
- Height and angle adjustable gutter troughs
- Narrow front assists manoeuvring around furniture and doorways
- Stable steel frame
- Fits over a toilet
- Foldable to 400mm
- Indoor use
- 150mm front castors and rear wheels

Pacer® Gutter walking frame with handbrakes

Code: 1905HB

Safe working load	160kg
Overall dimensions	W 570mm D 630mm
Handle height	min 800mm max 1250mm
Inside width	435mm
Width between centre of gutter troughs	min 360mm max 535mm
Folded depth	400mm
Product weight	7kg

- Ideal for individuals who have arthritis or a broken hand or wrist; forearms bear the weight
- Height and angle adjustable gutter troughs
- Steel frame
- Foldable to 400mm
- Indoor use
- Basket and tray included
- 150mm front castors, 150mm wheels at rear

Pacer® Gutter frame

Code: 66796

Safe working load	160kg
Overall dimensions	W 580mm D 685mm
Handle height	min 800mm max 1250mm
Inside width	440mm
Width between centre of gutter troughs	min 390mm max 555mm
Folded depth	400mm
Product weight	12kg

- Lightweight yet strong aluminium frame
- Height and angle adjustable gutter troughs
- Large wheels make it suitable for use indoors and outdoors and easier to push over rough terrain
- “One touch” hand brake system
- Folds easily for storage and travel
- Foam handgrips
- Comes with basket and tray

Parallel bars

Code: 6850

Vertical weight capacity	200kg/rail
Length	3000mm
Height	min 700mm max 1000mm

- Provides support in rehabilitative walking and posture exercises
- Shaped and lacquered wooden handrails for user comfort and durability
- Flat top surface, ideal for balance control
- Height adjustable
- Requires fixing to the floor

Wheelchairs

Wheelchairs	182
Heavy duty wheelchairs	184

Freedom lightweight manual wheelchair

	Code: 3035	Code: 3036
