R82 Addax supine tray

Code : 0500-912151

The R82 Addax supine tray provides a stable surface that supports the child's arms, helping maintain trunk stability and promote an upright posture. Its cut-out design allows the tray to fit closely to the child, enabling participation in a range of activities. The tray attaches once the child is positioned in the R82 Addax standing frame, with height, depth and angle adjustable to suit individual needs. For quick access, the mounting arms swing down easily using a push-button release.
