

Mangar rhino inflatable lifting device

Code: 7304

The rhino lifting cushion is an inflatable lifting device which lifts a person in the supine position from the floor to the height of a bed or stretcher. Powered by the Airflo Duo pump which operates on both mains and battery power. Also available as a complete supine transfer system including rhino, swift transfer slide, Airflo Duo pump and roller bag.

FEATURES

- Lifts up to 500kg
- Airflo Duo pump can be operated from mains or battery – it doesn't matter where the patient falls
- The pump handset fixes to the inflatable, allowing a hands-free approach from healthcare workers.
- Flexible, anti-rip lightweight material means folding and putting away the product after use is very easy
- Easy to detect when each level of the Rhino is fully inflated - visual and audio cues
- Screen printed markings to ensure patient is positioned on the products correctly and safely
- State of the art infection control materials used and seams are radiofrequency welded
- Complete supine transfer system weighs under 20kg
