Made in Germany

bock® v2 4-section electric bed

The bock® v2 is a 4-section electric bed that combines maximum comfort and ease of use. The professional design and economy of this bed is great for daily care in the home.

Combine good looks with durability for a tough, scratch-resistant prime melamine surface on the end boards. Available in either Oyster line velvet or Dark oak wood finish.

A range of optional extras are available.

4-section bed movement

Ergo Plus hand controller is designed for ease of use with fully adjustable mounting clip to allow multi positioning. The integrated disabler function allows all electric functions to be disabled with a simple hand controller lock.

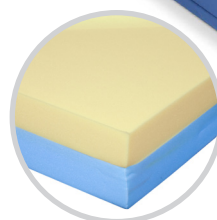

Dark oak endboards and Oyster line endboards

Posture-Temp™ mattress

The Posture-Temp™ mattress is made from unique temperature-sensitive, ultra-soft layers of open-cell, slow recovery, visco-memory foam. It warms to conform to the user's shape, maximising the body's contact area and thereby facilitating excellent comfort and support with great pressure redistribution.
