Ultra-low height

Excellent high height

Head and foot tilt

An all-purpose electric transport and recovery stretcher with excellent low height.

Helping patients on and off a general purpose stretcher has never been this easy or safe. With a design that allows the mattress base down to 400mm - lower than a standard office chair height - this versatile patient stretcher is ideal for use in departments like outpatients, emergency, theatre and day surgery.

With features such as a new E-Point system, a strong grip with the floor and solid, perfectly centred steer wheel - this patient stretcher is designed to accurately track and turn for safer transfers.

**Ideal for** Outpatients, emergency, theatre and day surgery

Code

Modsel Contour portare patient stretcher - Midnight blue

2031

100mm Premia mattress

Folding IV pole

Vertical oxygen bottle holder

Foot end board

Drop down push handles

2nd handset

USB port

Midnight blue accents

## FEATURES

- **Ultra-low height:** Very safe and easy for patients to get on and off. The 400mm low platform height of this table takes away the requirement to use step stools or unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button
- **E-Point steering:** A perfectly centred steer wheel ensures the stretcher always accurately tracks and turns. Operated by a very light touch pedal action, this wheel positively pre-loads onto the floor to ensure strong grip and rides up and down effortlessly over bumps and hollows to keep traction. Turning left or right from either end gives the same steering result
- **Effortless control:** Sit and position your patient comfortably and then raise and lower them to the desired work height with the touch of a button
- **Excellent high height:** Preserve your back and raise a patient up to your best working height. Lifting the platform height up to 830mm (plus an extra 100mm for the mattress pad thickness), helps you to examine and treat your patient without having to stoop over, ensuring easy access and less stress. The backrest travels from 0 to 85 degrees with emergency CPR quick release
- **Head and foot tilt:** A generous 15 degrees top tilt in both directions. Position a patient how you need them or quickly lower their head down and feet up in an emergency
- **Supercharged:** Keep things moving with long-life, cordless, fast-charge battery packs that work all day

**E-Point steering**
