Reval Transcare posture management bath

Code : 2820

The Reval is a highly versatile bathing system, which is ideal for residents with reduced posture control. The vertical-raise side door allows easy access, and the high-low function prevents the risk of caregiver back strain. The Transcare system features a unique tilting function, that allows residents with challenging conditions to semi-recline while fully immersed neck deep in water. Premium comfort and ergonomic design are specifically calculated to match caregiver needs.

FEATURES

- Luxury reinforced fibreglass tub design
- Variable height tub with autofill function
- Vertical raise side door allowing easy access with or without a hoist
- Unique tilting function
- Hand control with four functions (up/down and recline/upright)
- User-friendly digital touchless controls
- Integrated thermostatic water controls (TMV3 and WRAS Cat 5 Certified)
- Temperature control with anti-burn feature guarantees maximum safety
- Internal grab bar for increased safety
- Optional - Secured disinfection system
