Sentida SC ultra-low bed

Code (s) : 20004, 20007, 20055

The fear of falls is a common psychological consequence as you age. The Sentida ultra-low height, aged care nursing beds offer maximum safety, hand in hand with a cosy design.

The innovative 4-stop strategy and the SafeFree mobilisation aids help reduce falls, as well as the consequences associated with them and set new standards in terms of safety, mobility, height adjustability and cosiness. An additional SafeSense® option is available to provide greater safety without the need for restraints.

FEATURES

- Patented SafeFree mobilisation aids with four different heights eliminate the dangerous middle gap and helps care teams to meet new restraint guidelines
- Enables care teams to use 4-stop strategy to prevent falls and provide optimal working heights for care teams
- Ultra low height of 230mm
- Trendelenburg and reverse Trendelenburg functions
- Full 4-section electric functions with double sleeping surface retraction (mattress compensation). This reduces friction and shear forces for effective pressure injury prevention
- Smart handset featuring three safety levels, two automatic positions and night light
- Integrated bed extension by 100 or 200mm - adjusted without tools in seconds
- Central braking system with one pedal brake for each axle
- Two automatic comfort/positioning settings
- Compliance with new standard IEC 60601-2-52
