Mangar Eagle lifting cushion

Code : 7300

The Eagle lifting cushion is an emergency lifting solution designed to both sit up and lift a fallen individual safely and comfortably. It was designed for a safe and dignified lift after a fall while protecting care staff from injury. Its compact design is perfect for use in tight spaces such as bathrooms, and it's easy to operate, requiring minimal training. Made from durable polyurethane-coated nylon designed for use in any environment away from power.

FEATURES

- Ensures safe, dignified assistance for fallen individuals
- Has a lifting capability of up to 220kg
- Provides rigid support for the back, neck, and head
- Backrest gives additional support to raise the person from lying to sitting
- Each layer inflates individually and the sides can be folded up for use in tight spaces
- Set up is straightforward with colour-coded, numbered connectors
- Lightweight and portable with battery operated pump
- Easily deflates and stores away in the provided carry bag
- Suitable for indoors and outdoors use away from power
- Reduces the risk of injury for carers
- Simple to clean and disinfect
- Made from durable polyurethane-coated nylon
