Etac Molift Quattro gantry

Code (s) : 66546, 66547

A freestanding traverse gantry, the Molift Quattro is a gantry hoist unit that offers a (four-post) Traverse System, making it the best alternative when the hoisting need is temporary or when the facility is not built for fixed installations. The gantry is easy to install without the need to mount additional fixtures on the wall or ceiling. It is ideally suited for temporary hoist applications in nursing or private homes.

The gantry has a lightweight aluminium frame and four steel posts that provide excellent stability and cover the surface of the hoisting requirement. Molift Quattro solves a...

FEATURES

- Molift Quattro is a gantry system which has supreme stability and provides access in all lifting situations
- Designed to be installed in a short time by one or (preferably) two persons
- The hoist motor can easily be charged through the hand control or the in-rail charging option
- The traverse has a lightweight aluminum frame and four steel posts that provide excellent stability
- Operate together with the Molift Air or Molift Nomad hoist motor and a sling (ordered separately)
- Customisable sizing to suit the room
