Etac Molift RgoSling amputee medium-back sling

The Molift RgoSling Amputee is designed for safe hoisting and transfer of users with reduced muscle tone or amputated limbs. It provides full support for users with limited trunk or head stability, thanks to its anatomical cut and padding. Divided, extended leg parts allow secure positioning under both legs, with extra straps to prevent leg slippage. This sling ensures exceptional stability and comfort throughout the entire transfer process.

FEATURES

- Added support for users with impaired muscle tone or amputations
- Built-in waist belt for enhanced safety
- Divided, extended leg sections for secure positioning
- Extra leg straps to prevent sliding and boost confidence
- Anatomical cut with padding for full support during transfer
- Narrow opening for increased safety
- Suitable for hoisting to/from horizontal and sitting positions

Etac Molift RgoSling amputee medium-back sling
