R82 Addax adjustable 3D sandals

Code (s) : 0500-912182, 0500-912183

R82 Addax adjustable 3D sandals attach to the Addax standing frame, giving flexible, individualised foot positioning. A ball joint underneath each sandal allows movement in all directions, while adjustments in height, depth and width help compensate for asymmetries such as leg length differences or limited knee and ankle mobility, supporting comfortable weight-bearing and standing. Height adjustment requires tools; all other adjustments are tool-free for quick, easy setup. Available in two sizes to suit different users.

FEATURES

- Ball joint underneath sandal allows movement in all directions for individualised foot positioning
- Adjustable in height, depth and width to compensate for asymmetries such as leg length difference or limited knee/ankle mobility
- Supports comfortable weight-bearing and standing
- Toolless adjustments except for height, which requires tools
- Compatible with the R82 Addax standing frame
