R82 Addax arm supports

Code (s) : 0500-912132-90, 0500-912131-90

Upper arm supports for the R82 Addax standing frame can help the child feel stable and comfortable by widening their base of support. When standing, they help the child maintain postural control and allow the arms to rest naturally in front of the body. During lying transfers, the supports provide an extended support area.

FEATURES

- Widens base of support for stability
- Supports postural control while standing
- Provides extended support during lying transfers
