R82 Addax chest pad

Code : 0500-912142-90

The R82 Addax chest pad provides support for the chest area, helping the child maintain a stable and upright posture. It can be adjusted in both depth and height for the best possible support. Height is adjusted by extending the centre column, which also lets the pad grow with the child and keep proper alignment over time. Slots allow easy mounting of a support belt or extension pad, and fix locks enable vest attachment. Height adjustment requires tools, while depth adjustment and accessory mounting are tool-free.

FEATURES

- To suit the R82 Addax standing frame
- Adjustable in depth and height
- Grows with the child
- Slots for support belt/extension pad
- Tool-free accessory mounting
