R82 Addax knee support 3D

Code : 0500-912170-90

The R82 Addax knee support 3D fits the R82 Addax standing frame and can be tailored to individual leg positioning needs, supporting comfort and postural alignment. A ball joint allows full directional movement, with adjustments in height, depth and sideways position for an optimal fit. Magnets in the cover keep the supports securely together and out of the way during positioning, while a ratchet system makes wrapping them around the leg quick and easy. Height adjustment requires tools; all other adjustments are tool-free. Available in black wipeable fabric.

FEATURES

- Ball joint for full directional movement and individualised leg positioning
- Adjustable in height, depth and sideways for an optimal fit
- Magnets keep supports securely together and out of the way
- Ratchet system for quick, easy wrapping around the leg
- Toolless adjustment except for height
- Black wipeable fabric for easy cleaning
