R82 Addax pelvic pad

Code : 0500-912140-90

The Addax pelvic pad for the R82 Addax standing frame provides postural support for the pelvic area. The depth of the pelvic pad can be adjusted to fit the individual needs of the child. It is fixed in height to maintain alignment with the abduction module. This ensures that the child has optimal conditions for hip abduction. Slots in the pelvic pad allow easy mounting of a support belt or extension pad, and fix locks enable vest attachment. Depth adjustment requires tools, while mounting of accessories is toolless for quick and simple setup.

FEATURES

- Postural support for the pelvis
- Adjustable depth
- Fixed height for abduction alignment
- Slots for belt/extension pad

R82 Addax pelvic pad
