R82 Addax prone tray

Code : 0500-912150

The R82 Addax prone tray fits the R82 Addax standing frame and provides a stable surface that supports the child's arms, helping maintain trunk stability and promote an upright posture. Its cut-out design allows the tray to fit closely to the child, enabling participation in a range of activities. The tray can be adjusted in height, depth and angle to suit individual needs.

FEATURES

- Provides a stable surface supporting the child's arms and trunk stability
- Cut-out design fits closely to the child, enabling participation in activities
- Adjustable in height, depth and angle to suit individual needs
