R82 Meerkat standing frame

The R82 Meerkat standing frame supports an upright standing position, with quick and easy adjustments to meet each child's individual needs. The stander can be used with the centre column positioned in front of, or behind, the child. This flexibility provides various possibilities for a balance of support, and freedom of movement. Available in three sizes and colours.

FEATURES

- Facilitates an upright standing position
- Adjustable centre column in front or behind the child
- Provides support for maintaining a standing posture
- Improves balance and stability
- Customisable positioning options
- Promotes independence and participation at eye level
- Easily adjusted for growth and changing needs
- Encourages lower extremity weight-bearing for development
- Simple ratchet system for chest support adjustment
