Autolift i-swim 2 mobile spa pool lift

Code : 5503

The Autolift i-swim pool and spa lifts are portable devices that allow disabled users and those with restricted mobility to safely access pools and spas. Known for their good looks and ease of use, they're among the world's most popular portable pool lifts.

The i-swim 2 hoist can be operated independently or with help. It's lighter and easier to move than most rivals, making it popular with aesthetically-conscious facilities. To use, the person sits on the chair, the lift is positioned, the brake applied, and they are lowered into the water with a push of a button.

FEATURES

- Portable lifting device to enable users with restricted mobility to access above ground swimming pools and spas on their own
- Can be used independently by the user
- Parallelogram lifting structure
- Patented anti-tip and stabilising system
- Easy to move
- Approx 50 cycles per battery charge
- Aluminium and stainless steel construction
- Considerably lighter and easier to move than other user-operated portable pool lifts
- Handheld controls
