TA MWD RS wheelchair

Code : XTAMWD-RS

The TA RS powered wheelchair has been engineered for speed, agility, and convenience. Standing out as the fastest in its class, the wheelchair boasts a speed of up to 15km/h, offering unmatched swiftness and efficiency. The TA RS has a unique design, sitting lower than any other wheelchair available, enabling users to effortlessly glide underneath standard tables and desks with ease. This enhances accessibility and convenience, allowing for seamless navigation in various environments.
TA have a wide range of accessories available. Contact us for more information.

FEATURES

- Low seat plate to a minimum height of only 15", fitting under tables and desks. It is the lowest powered-wheelchair on the market
- The super low sitting feature brings improved stability when driving
