# Bea II mobile recliner

After years of research and development, we're proud to introduce the Bea II mobile recliner, an evolution of our most popular recliner. Building on the comfort and style of the original Bea, the Bea II features a slimmer arm profile and adjusted arm and seat heights, designed in response to customer feedback for accessibility and ease of use.
It retains the retractable leg rest, durable base, and full compliance with the latest restraint guidelines, all wrapped in a sleek, modern design that prioritises comfort. Available in a soft, waterproof fabric and an extended range of vinyl options.

## FEATURES

- Modern aesthetic
- Slimmer arm profile compared to the Bea recliner
- Curved arms provide an easy grip surface and assist the resident getting in and out of the chair
- Curved wings promote lateral support and correct posture, enabling the resident to feel both comfortable and supported
- A zero-gravity position can be achieved when reclined, creating a comfortable place to rest and assisting with pressure care
- Recline system can be easily controlled by the resident or care staff, depending on the individual needs of the resident
- Retractable leg rest, durable base and meets the latest restraint guidelines
- Legrest folds securely away, allowing the resident's feet to plant firmly on the ground, forming a 90° angle, before safely exiting
- Equipped with easy-to-wheel, smooth twin-track castors and a timber push handle, the resident can be moved around with ease
- Designed with a unique steel base plate, creating a solid, durable foundation for the chair, helping to eliminate general wear and tear seen with usual timber framing
