Meyra Netti Dynamic AdaptPro wheelchair

Code : XMENETTI-D

The Netti Dynamic AdaptPro wheelchair is ideal for individuals with total extension spasms or involuntary hip and back motions. This fully dynamic chair combines exceptional sturdiness with a compact design for easy maneuverability. Featuring a dynamic back and seat unit, optional leg and head supports, and a low seat height, it prioritises comfort and stability while reducing peak pressure by 20%. With a turning radius starting at 500mm (without leg supports), this wheelchair offers effortless navigation in various environments.

FEATURES

- 20% lower peak pressure
- Low seat height
- Very manoeuvrable and steady
- Dynamic back support helps the user maintain the optimum seating position, prevents sliding and shearing and lowers the need for repositioning
- Optional dynamic leg supports accommodate the extension movement in the knee joint and support the pushing movements along the tibial axle and the flexion-extension movements of the feet
- Optional dynamic head support reduces stress on the back and neck of the user

Meyra Netti Dynamic AdaptPro wheelchair

SPECIFICATIONS
