Meyra Netti AdaptPro wheelchair

Code : XMENETTI-A

The Netti AdaptPro wheelchair is designed for individuals experiencing total extension spasms or involuntary hip and back movements. This fully dynamic chair combines exceptional sturdiness with a compact design, ensuring easy maneuverability. Engineered for comfort and stability, it features reliable leg supports by Netti Grandis and a user-friendly handling system. With a turning radius starting at 500mm (without leg supports), it offers effortless navigation in various environments.

FEATURES

- Ergonomic back design with the correct hinge point at the hip, ensures that there is no friction of the skin against the back cushion when reclined, which minimises shear forces and tissue deformation
- 20% lower peak pressure
- Extra stable when tilted
- 90mm wheel footprint adjustment for great stability
- Patented frame design ensures a safe experience for the user
- Compact and easy to manoeuvre
- Turning radius of 500mm makes the chair easy to drive even in narrow places
- Solid leg supports by Netti Grandis
- Handling is simple and straightforward
